FEE Introductory Book Sets

The FEE staff is often asked where a person can begin a study of the freedom philosophy. So we have carefully selected several paperback titles well suited to provide an introduction to the basic ideas on liberty. We have grouped them into two sets, in two price ranges—at savings over single copy prices. Each set, too, contains a cloth copy of Leonard Read's last book, *The Path of Duty.*

These sets make excellent birthday or holiday gifts. Or, why not give a set to a favorite high school or college student—an excellent way to invest in the future of freedom!

Introductory Set I

The American Tradition by Carson
Economics in One Lesson by Hazlitt
Essentials of Economics by Ballvé
Fiat Money Inflation in France by White
The Incredible Bread Machine by Brown et al.
The Law by Bastiat
The Love of Liberty by Read
The Mainspring of Human Progress by Weaver
The Path of Duty by Read
Planning for Freedom by Mises
The Road to Serfdom by Hayek
Talking to Myself by Read
The Tariff Idea by Curtiss
To Free or Freeze by Read
What Has Government Done to Our Money? by Rothbard

Only $30.00 (normally listed at **$43.85**)
Order number **0301XX**
Please use separate section of the order form.

Introductory Set II

In addition to the 15 books in Set I, these 12 books are added to provide a more comprehensive introduction:

Age of Inflation by Sennholz
The Anti-Capitalistic Mentality by Mises
Bureaucracy by Mises
Can Capitalism Survive? by Rogge
Capitalism and the Historians by Hayek et al.
The Foundations of Morality by Hazlitt
Free Market Economics: Syllabus and Reader (2 vols.) by Greaves
Organized Against Whom? by Carson
The Roots of Capitalism by Chamberlain
Value and Price by Böhm-Bawerk
With Wings as Eagles by Gresham

Only $70.00 (all 27 books—normally listed at **$108.15**)
Order number **0302XX**
Please use separate section of the order form.

Faustino Ballvé

ESSENTIALS OF ECONOMICS

This is a primer of economics for the intelligent layman by a great Spanish authority. It deals lucidly with the basic concepts of economics and puts economic thought into historical perspective. It is a positive presentation of the principles of economics. 126 pages

Paperback **1210PF** **$3.00**

Frederic Bastiat

ECONOMIC HARMONIES

It has been the great work of economics to discover the natural harmony that results when men are free to pursue their interests in their own way and prevented from using force and fraud. By contrast, socialists find discord, disharmony, and exploitation when men are free. Bastiat reaffirms and reasserts harmony in this his most extensive exposition of economics. 596 pages

Paperback **1510PF** **$7.00**

ECONOMIC SOPHISMS

This is Bastiat's most delightful book. It is devoted almost entirely to exposing the fallacies of protectionism and associated policies. His method is the logical extension of their ideas to the point that their absurdities become apparent. Bastiat bemoaned the necessity of going deep, but his writings are so luminous that the reader can stand safely on the shore and survey the depths. 271 pages

Paperback **1515PF** **$5.00**

SELECTED ESSAYS ON POLITICAL ECONOMY

The discovery of economics by Bastiat conferred a great boon on the world. For through him a delightful way was provided for every literate person to discover economics. It was Bastiat's insight that all schemes of government intervention are more than somewhat ridiculous. It was his gift to present them in such a framework that others could see them in the same light. His essays on political economy hold the state up to the bright glare of the light in such a way that none who have read it should ever again be fooled by the fraudulent claims of the benefits of the use of political power. 352 pages

Paperback **1525PF** **$6.00**

(See also Roche and Russell on Bastiat.)

Frederic Bastiat

THE LAW

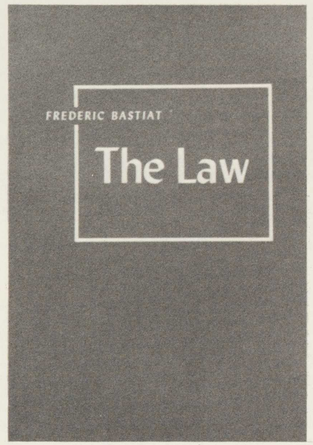
The law, it has been said, is nothing more than the will of tyrants. So it has been many times in history. But just laws depend upon a law which underlies the law passed by legislatures or declared by rulers. It is a law which provides the framework of liberty. Emancipation from the doleful theories of the compulsive state awaits discerning readers of this brief treatise.

This remarkable volume, translated in 1950 by Dean Russell, has been a best seller since then—one of the most clear and concise arguments of the case for limiting government in the cause of freedom. 76 pages

Cloth **1520CF** **$3.50**

Paperback **1520PF** **$2.00**

Special offer: 60 cents each for 100 or more copies (paperback) to a single address. Please specify order code 0401XX and enter on appropriate line of order form.



Eugen von Böhm-Bawerk

THE EXPLOITATION THEORY OF SOCIALISM-COMMUNISM

The Labor Theory of Value was the foundation of Karl Marx's theory of exploitation, as well as that of many other socialists. Böhm-Bawerk here subjects the theory to careful analysis and exposes its fallacies. The impact of this demonstration is to cut the foundation from under Marxism. 178 pages

Paperback **1810PX** **$6.00**

VALUE AND PRICE

Marx claimed that the price goods bring is determined by the labor that goes into making them available. The Austrians developed a counter theory to that of Marx. Value was their crucial concept in this theory. In this extract from a larger work, Böhm-Bawerk makes the seminal formulation of what he called "the subjective theory of value." By way of this theory, the buyer in the market place assumes his important role in determining price. 272 pages

Paperback **1815PX** **$6.00**

Susan Love Brown (and others)

THE INCREDIBLE BREAD MACHINE

Most history textbooks are filled with bias against private enterprise, and in favor of government intervention. A group of young people assembled materials that counter that bias. In clear and provocative language they have described the doleful impact of government intervention in the economy. They have, by so doing, uttered an articulate cry for freedom. The young may have their eyes opened by reading it; older readers may find hope in the appearance of such thoughtful young writers. 192 pages

Paperback **2110PX** **$2.95**

"Knowledge appears and grows with the passage of time . . . in proportion to this growth of knowledge, might *takes the side of* right, *and society regains possession of itself."*

FREDERIC BASTIAT
