James M. Rogers . . . . . 30 min.

FREEDOM FOLLOWS THE MARKET
Dr. Dean Russell . . . . . 30 min.

ECONOMIC GROWTH
Dr. Dean Russell . . . . . 30 min.

The sound films in the above series are standard black and white kinescopes made from video tape, and may be shown on any standard 16 mm sound projector equipment with 1,000 watt bulb capacity. These sound films have been produced by FEE for the American Management Association for use in their own numerous seminars throughout the country. However, these may be rented by friends of FEE, the rate to include 5 days' use. For booking dates and rental rates, write Daniel C. Cady, A.M.A., 1515 Broadway, New York 36, N. Y.

LP *Records*

Because sound films are expensive to produce; because the rental rates will be beyond the means of many interested persons; and because only a few people own the necessary projection machinery, FEE has decided to test the LP record market. Nearly everyone has LP record playing equipment. The LPs (33⅓ rpm) can be produced and delivered for $3.50 each.

At the time of this announcement, two records have been produced: **Essence of Americanism** (three sides) and **Clichés of Socialism** (one side) by Leonard E. Read. The regular price for the set of two records is $7.00.

Until June 1, 1962 a special introductory price of $5.00 will be in effect.

If an adequate market for LP recordings is indicated (less than 2,000 is uneconomical), the other lectures in the above sound film series will also be recorded on discs. Indeed, we have numerous other recordings in mind.

Your response to this introductory offer will give us the information needed to make a decision.
