Please...

- Slow down.
- Take a moment to read this pamphlet.

Consider Why You're Here...

- You have no choice?
- Not enough money?
- No place to live?
- Afraid to face your parents or friends?

The Problems You Face are Real...

Abortion may seem like the "only way out." But it's not. The Pregnancy Resource Center can provide you **real help**.

Confidentially.

Without charge.

You can skip your abortion appointment and call us at 617-825-0838. Know *all* of your options.

Does Abortion Hurt?

Yes. In an abortion the cervix is *forcefully* dilated. Cervical damage and perforation of the uterus are not uncommon. Other risks include hemorrhage, infection, shock, death, loss of interest in sex, and depression. Your reservations are well founded.

Another Way Out...

Housing

There are people ready to welcome you into their home right now, if that is what you need. We understand that it is important for you to be surrounded by people who care and are in your corner.

School & Job

You probably think you'll have to drop out of school or quit your job, right? Wrong! School and work are important, too. We help women successfully combine school and work with the unique joy and challenge of motherhood.

Everyday Needs

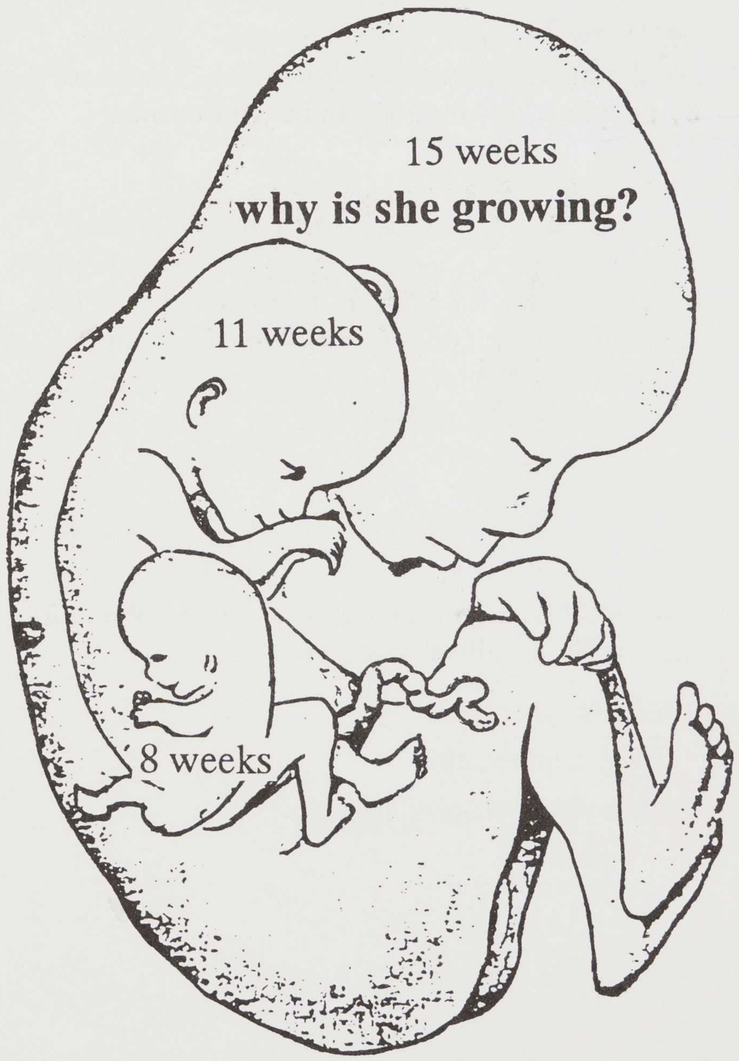
You don't have to choose an abortion because of a lack of resources. We can help with the following needs:

- Medical Insurance
- Baby Clothes, etc.
- Other support services

Is it a Baby?

Absolutely! Your baby's heart is beating righ now and has been since she was 18 days old. Your baby sucks her thumb, swims in the womb, and can feel pain.

Remember, this is *your* baby, a little person that can *never* be repeated. She will always be your baby and you will *always* be her mother

A TINY PERSON — HER ACTUAL SIZE AND APPEARANCE...


If she is not alive,
