Mr. Marshall Whitlock
American Consular Agent
Blvd. Vivaldo Lima, 25
Manaus, Amazonas

Dear Marshall:

I refer to your recent note regarding Dr. Gonzaga who is interested in additional medical training in the United States.

According to information available, there are no programs sponsored by the U.S. government other than government support to medical schools for special research projects. Dr. Gonzaga, however, may wish to contact the University of Tennessee Medical School with the idea that something might be worked out under the sister state arrangement under the Partners for the Alliance program which teams Tennessee with Amazonas.

In an case, Bill Jacobsen of USIS will look him up the next time he is in Manaus to discuss the matter further.

Thank you for your assistance on the Rayichen case. As things turned out he went back to Caracas and by now should be on his way home.

Hope to see you soon. With best regards to all.

Sincerely yours,

John P. Steinmetz
American Consul
