00092

February 19, 1968

The Embassy of the Dominican Republic presents its compliments to the Department of State of the United States and has the honor to transmit to it herewith a call for prequalification bids on the Tavera project that has been circulated by the Corporación Dominicana de Electricidad [Dominican Electric Power Corporation] of the Dominican Republic.

The call issued by the Corporación Dominicana de Electricidad is addressed to any competent civil engineering firms in the United States, Central America, or South America that are interested in executing civil works and concreting, with the request that they state whether they are interested in the Tavera project, which will consist in an earth-fill dam approximately 80 meters high and a 40-MW hydroelectric power plant (which will eventually be increased to 80-MW) on the Yaque del Norte River, in accordance with studies made by the consultants, Mahmeyer International GmbH. of Frankfurt, Germany.

The reservoir will be connected with the generating plant by a tunnel approximately 4,600 meters long and 6.50 meters in diameter. The descriptive booklets on the Tavera project, which will make it possible for the contracting firms to submit prequalification documents for the aforesaid work, will be available soon at this Embassy. The prequalification bids must be submitted to the Corporación Dominicana de Electricidad in Santo Domingo before March 15, 1968.
