TRAVEL AND CONVENIENCE LOCK

The Yale Travelok is a portable lock requiring no permanent attachment to the door which it secures. This lock may be conveniently carried and employed in hotels or other public dwellings for added security. It will provide additional protection against most conventional bypassing techniques. The lock assembly is composed of lock case, which houses the cylinder, a hardened steel locking bar and face plate.

COST

BODY ARMOR

Federal Spooner Armor provides protection against all types of hand guns and bomb fragments. This includes .357 metal piercing magnum cartridges (1430 fps muzzle velocity) and cartridges of like velocity. The armor is doubled overlapping and interlocking steel alloy plates. It is fitted so as not to restrict movement. The metal plates are encased in a heavy duty repellent nylon.

SPECIFICATIONS

Federal Spooner Vest Model P (front and back plate)	WEIGHT: 16½ lbs.
Federal Spooner Vest Model P (front only)	WEIGHT: 9½ lbs.

COST

MODEL NUMBER	ITEM	UNIT COST
Model P	Federal Spooner Armor Vest	\$123.00
Model P (front only)	Federal Spooner Armor Vest	63.00

SECRET

ARMORED HOOD

The Federal Spooner Armored Hood is constructed of overlapping steel plates. These plates are encased in a heavy duty water repellent nylon. The hood will repel .357 metal piercing magnum cartridges (1430 fps muzzle velocity) and cartridges of like velocity. Inside of the hood is a layer of shock absorbing material. Elastic webbing makes this unit adjustable to any size head.

COST

ITEM	UNIT COST
Federal Spooner Hood, front and throat coverage	\$65.00

SECRET

BODY ARMOR LIGHTWEIGHT

Federal Spooner Armored Vest Model C is a lightweight armor which will provide protection against .38 caliber special rounds. This armor will not protect against the .357 magnum. The vest is composed of a single plate. This plate is encased in a water repellent nylon. The armor may be purchased in a vest consisting of front and back plate or in front plate only. The vest may be worn under a shirt constructed of heavy material.

SPECIFICATIONS

Federal Spooner Vest Model C (front only)

WEIGHT: 5 lbs.

SECRET

BODY ARMOR, MAXIMUM PROTECTION

Ceramic Body Armor consists of a super-hard ceramic shield which is bonded to a fiberglass backing. This is covered with a ballistic nylon "spall shield", which prevents bullets from ricocheting. This armor will protect against the .375 magnum, .30 armor piercing and other caliber weapons with bullet velocities up to 3,000 fps and 3,100 ft. lbs. energy. The bullet proof vest comes in both back and front plates. The described armor is too bulky to be worn under clothing.

MINIATURE MACE

The General Ordinance Equipment Corporation's MK II Miniature Mace is designed to fit inconspicuously into a shirt or coat pocket or pocket book. The unit projects a shotgun-like pattern of heavy droplets. The range is approximately 6'. The mace does not cause permanent injury but will incapacitate an assailant for up to twenty minutes. The MK II, on an average, will fire eight bursts of mace.

COST

SECRET

TRIGGER ACTUATED CHEMICAL MACE

The General Ordinance Equipment Corporations MK V Trigger Actuated Chemical Mace Unit is a nonlethal type weapon. The unit is designed as a pistol grip and is equipped with a safety to prevent accidental discharge. It has a range of from 15 to 20 feet. The mace cartridge provides approximately 80 half-second bursts. The pistol grip type dispenser is equipped with a sight which permits the mace to be projected more accurately on its target.

WEAPON MAGNETIC DETECTION DEVICE
HAND CARRIED

The "Friskem Night Stick" and the "Friskem Flashlight" are hand carried metal detection devices which operate on the principle of the disturbance of the earth's magnetic field through the introduction or removal of magnetic metals. These units will permit a security guard to locate concealed metal objects on a person without touching the individual or the carrier being searched. It will alarm when weapons, ranging from guns to knives to as small as hypodermic needles, are encountered. Heavy clothing is not a deterrent with respect to the effectiveness of the device. This completely passive unit could be extremely important when dealing with women. Both of these detectors may be used to augment the walk-through station (discussed as a different entry in this document) or independent of such a station.

SPECIFICATIONS

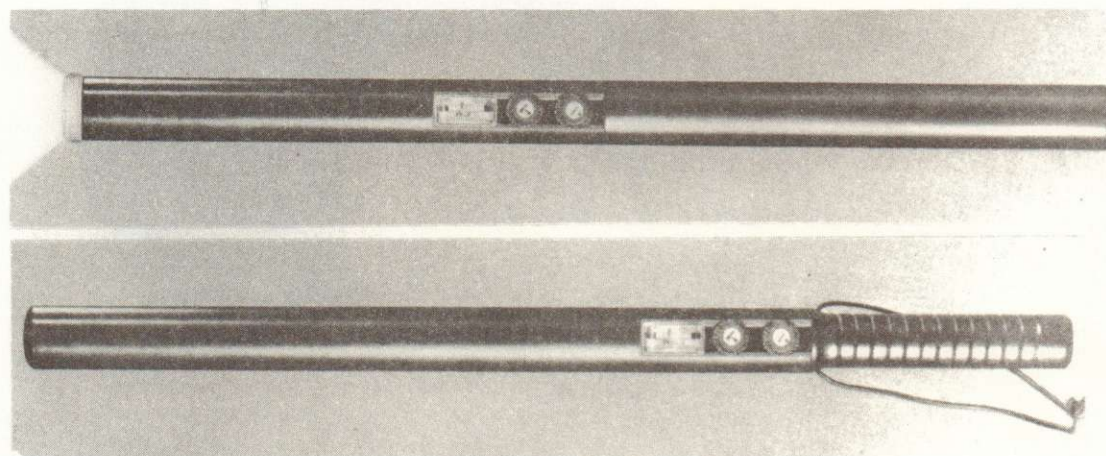

NIGHT STICK LENGTH: 24"
NIGHT STICK DIAMETER: 1½"
NIGHT STICK BATTERY LIFE:
Approximately 50 hours
FLASHLIGHT LENGTH: 25"

FLASHLIGHT DIAMETER: 1½"
WEIGHT BOTH UNITS: Less than 2 lbs.
CONTROLS BOTH UNITS: Range and
sensitivity
METER BOTH UNITS: View

COST

ITEM	UNIT COST
Friskem Night Stick	\$99.50 each, less than 10
Friskem Flashlight	124.50 each, less than 10

SECRET

REVOLVER SHOTGUN

The Quiet Special Purpose Revolver is a weapon ideally suited for defense. The pistol was developed for special use in Viet Nam. When it is fired the noise generated is less than that of a .22 caliber revolver equipped with a silencer. This pistol can be employed by an individual with little or no training. Preliminary test of the weapon revealed that approximately one of ten rounds misfired. However, this problem has been determined to be in the ammunition. The manufacturer is currently in the process of resolving the problem. Acceptable ammunition is expected in August of 1970.

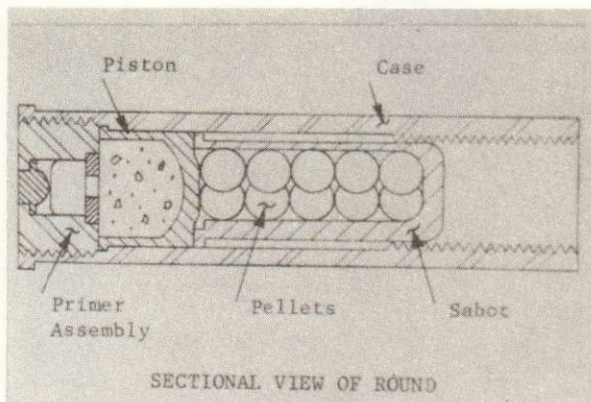

SPECIFICATIONS

WEIGHT: 2 pounds	OVERALL LENGTH: 6 3/4 inches
BARREL LENGTH: 1.375 inches	CYLINDER: 6 chambers
MUZZLE VELOCITY: 750 fps	MAXIMUM EFFECTIVE RANGE: 50 ft.
