

The Foundation for Economic Education was founded in 1946 to combat the prevailing trend toward state intervention in human affairs. FEE's method is to study and explain the alternative to intervention: the free market, private property, limited government concepts and the moral and spiritual principles on which this country was founded. This catalogue is a report of progress in developing, in modern American idiom, a consistent literature of freedom.

The list, of course, by no means includes all the books worth studying in the field, but it will suggest areas of study. Nor has every book listed here been finely combed for consistency in every last detail. Indeed, any serious student will want to read any book with care and discrimination, gleaning from it such truth as he can find, and rejecting that which to him seems false or misleading.
