

FROM THE FOREWORD

● "I have no reason for attempting a manual of libertarian leadership except the conviction—born of three decades of trial and error—that our waning individual liberty is more difficult to restore than most people judge. It would be shameful for any person, thinking he knows how deep the ore lies, to keep silent while millions of people wastefully prospect on the surface.

"The emphasis in this volume is on methodology. Assuming an individual has mastered the philosophy of freedom, what can he do about it? With whom does he work? What are his limitations? His potentialities?"
