Coal News: Weekly newsletter of events of interest and importance to the bituminous coal industry. \$50 per year.

Coal Facts: Biennial multi-color book with tables, describing the modern bituminous coal industry and coal's importance to U.S. economy. \$5 per issue.

NOTE: *The following publications are designed for use by teachers, librarians and counselors; and are available in single copies only.*

Coal and the Environment: A 12-page, illustrated booklet describing the latest developments in air pollution control, mine drainage and the reclamation of surface-mined land.

Coal and Research: A 12-page, illustrated booklet outlining progress in converting coal into gaseous and liqued fuels, improving mine health and safety, controlling water and air pollution, developing a coal fuel cell, generating electricity from coal by magnetohydrodynamics and studying improved methods of coal combustion.

Map of Coal Areas in the U.S.: A 9x16, two-color folder showing deposits of bituminous coal, sub-bituminous coal, lignite, and anthracite. Reserve and production figures for individual states included. All grades.

Coal in Today's World: A 23-page, two-color booklet describing the beginnings, history, production and uses of bituminous coal. Grades 1-6.

Coal: A 24-page, illustrated reprint of *The World Book Encyclopedia* article on coal. Grades 7-12.

Wall Charts: Two, 18x24, two-color wall charts with text and photographs—one describing surface and underground mining methods, the other outlining uses and transportation of coal.
