

Crack Pots or Crack Shots

This story goes hand in hand with the Last article. The FBI and assorted federal agencies have subverted most of the major militias. It would be surprising to know how much of the leadership as well as the general membership are federal agents or informants.

When you have no control your opposition then you have no opposition. Read the articles from S.O.F. magazine. See who the feds, the new world order, considers their enemy and a threat to their power. It is not the John Birch militias that have been in effect had their teeth pulled.

It is the white only groups who are the resistance to the N.W.O. Beware of those leaders to 'quote the party line' of the NWO racial intergration policies. Their words bare witness to where their loyalties really lay. Look around at what the darkies and intergration have done to this country. Violence, drugs and mongrels. any militia leader that says white racism is evil and a enemy to americanism is a New World Order to collabotator. Its just that plain and simple. When they come after your guns give the Bastards the ammo first. With any resistance group you must choose your leaders wisely. be very careful of your associates. Look out for a leader who is crack shot, not a crack pot. There are plenty of crack pots out there- they usually have a big mouth, do a lot of posturing, will antagonize a confrontation and then back down. Be careful.

Bug out packs

Keep it in your car or by the bed. Be ready to go at a minutes notice. \$30.00 post paid. cash or leave 'pay to' space blank on money order.

FBI SPOKESMAN: MILITIAS "NOT DANGEROUS"

Addressing a group of retired intelligence officers, Kenneth Piernick of the FBI's Domestic Terrorism Operations Unit noted that few "militia" units are psychopathic and dangerous, stating that most of the groups are "not dangerous, work for a living, and exist primarily to do target shooting." Piernick named some of what are considered to be the more dangerous groups and described their motivation, which was mostly religious-based, anti-tax or anti-Semitic. At the time of Piernick's talk, the FBI currently had some 18 investigations open on various "militia" groups.

One should appraise a war first of all in terms of 5 fundamental factors and make comparison of various conditions of the antagonistic sides in order to access the outcome. The first of the fundamental factors is politics. Sun Tsu's "Art of War"
