

Library Support Services for RI NSF EPSCoR Researchers: Complying with NSF Policy “Public Access to NSF-funded Results”

BROWN

Hope Lappen and Andrew Creamer
Brown University Library, Providence, RI

NSF Award
#1004057

Overview

In 2016, the NSF released its policy “Public Access to NSF-funded Results”. As part of this policy, researchers will be required to deposit the final accepted version of their peer-reviewed manuscript in the NSF Public Access Repository (NSF-PAR). This poster has highlights from the recent RI NSF EPSCoR workshop held at Brown Library to teach researchers how to comply with the Public Access requirements and deposit in NSF-PAR.

About NSF-PAR

<http://par.nsf.gov/>

- The policy NSF-PAR requirement only applies to publications submitted in project reports and does not impact the proposal stage (at this time).
- NSF does not currently permit the depositing of these documents by anyone other than the PI or co-PI.
- NSF-PAR will allow PIs to associate multiple award IDs to a manuscript. The manuscript is only uploaded once. After it has been uploaded and associated with an award, co-authors with other NSF awards may associate their awards with the metadata record, which is then incorporated into their project reports.

Depositing in NSF-PAR in 5 Steps

1.) Log-in to Research.Gov and select “deposit publication” in My Desktop

2.) Locate the Digital Object Identifier (DOI) assigned by your publisher

3.) Enter your DOI

4.) You must convert your file to

before you upload!

5.) Finally select your Award ID and review
