

UNCLASSIFIED

Dr. Alvin Moxon, Ohio Contract

November 25, 1968

Jerome Hulehan, Agri. Program Officer, ARDO

The Microbial World by Stanier, Doudoroff and Adelberg

1. This is one of the books ARDO has planned to translate and publish under its book program. In October 1966 in a meeting of the Book Translation Committee, Dr. Deatherage said ESALQ-OSU would accept responsibility for translating this book. Subsequently I was informed that Dr. Alcides Martinelli and Dr. Rodolfo Camargo at ESALQ would do the translation.

2. Since October 1966 we have had several delays in this program which I won't go into here, but I believe you are somewhat familiar with the problems.

3. Perhaps you noted in my memo of conversation (10-17-68), of which I sent you a copy, that The Microbial World has already been translated into Portuguese. The USAID may purchase 1500 copies of this book for distribution.

4. Can you please inform the gentlemen at ESALQ that the book is already translated?
