June 9, 1964

Dear Member:

Physicians for Social Responsibility has purchased and is sending to every member a copy of "War and Medicine," published by the Greater St. Louis Citizens Committee for Nuclear Information. We have chosen this issue of Nuclear Information to distribute because it speaks directly to the problems that PSR has raised and complements our studies in the New England Journal of Medicine and in "The Fallen Sky." This issue has also been chosen to exemplify the excellence of presentation in Nuclear Information. Members may be interested in the other issues described in the enclosed index and order form.

Enclosed also is the program for the Scientists on Survival Meetings at the Hotel Roosevelt in New York City on June 19-21, at which PSR will sponsor a session. The PSR Executive Committee is now preparing a statement on chemical, biological and radiological warfare which will be released at the time of the PSR session. Copies of the statement will shortly be sent to all members in the hope that efforts at support and dissemination can be made in each community. We also hope that many of you will find it possible to attend the PSR session in New York City on Friday afternoon, June 19. An informal dinner meeting of PSR members from all over the country who are attending the Meetings has also been planned for Friday evening and further details will be available at the Meetings.

Sincerely yours,

Victor W. Sidel, M.D.
Vice-chairman
