SUBJECT : Russian Subsidized Technical Books

REF : CERP Section D; A-4, 7/2/65; A-352, 6/11/65

Transmitted herewith is a copy of the current list of Russian technical books, on sale in São Paulo, which were the subject of the referenced airgrams. The following points are worthy of note:

(1) The price continues absurdly low, leaving little doubt that the books are subsidized. Note for example, a "Course of General Physics" at 2,550 cruzeiros with the current exchange at 2,200 to the dollar.

(2) The list now includes some books translated into Spanish. Previously, all were in French or English.

(3) A note at the end announces that more than 100 new titles will be added in 1966.

For the Minister Consul General:

NOTE: Rec'd in RS/AN for  
processing & distribution.
