

CREATING A.T. AUDIOTAPES

ASPI invites participation in creating an appropriate technology audiotope series to be included in our publications for 1993. We ask for advice and suggestions on: need assessment, subject matter, amount of material to be included on the tapes, price, and production equipment needed.

Chronic Safety Problems

Congress is pushing to further restrict public safety hearings for nuclear plant licensing. But the nation's 111 licensed reactors continue to operate with 787 Unresolved, Generic and Three Mile Island safety problems, many more than a decade old.

Unimplemented Safety Issues at U.S. Nuclear Plants
