

Help Print the Spanish Marxist-Leninist Study Outline

The English edition of the *Outline for the Study of Marxism-Leninism* has recently been published. This important contribution to the world communist movement will not be complete without the Spanish edition of the *Outline*.

With the present confusion in the revolutionary movement, amid "third worlds," "parliamentary roads to socialism," "states of the whole people," and other concepts alien to Marxism, the need for this outline is clear — it will facilitate the reassertion of scientific socialism.

Internationalism is the immediate demand amid the present family-feuding that exists worldwide among communist parties. The call for internationalism and the reassertion of Marxism-Leninism, especially among North American revolutionaries, cannot be taken seriously without the simultaneous call for hemispheric unity.

With good reason the United States imperialists guard Latin America like a precious jewel. Any upsurge there is immediately met with brutal counter-revolution. Revolution in Latin America is blocked by the control of U. S. imperialism. The movement for socialism in the U. S. is held back by this stranglehold of U. S. imperialism on Latin America.

The economic ties between the workers in the United States and Latin America have forged their political ties. Practically every major industrial company in this country is also located in Latin America. The high standard of living of the working class here is bought at the expense of the toilers of Latin America, who are the ally of the working class of the United States in the struggle for socialism. The interconnected web of economic and political relations throughout the Americas demands a hemispheric revolution. But as Lenin clearly stated, "without revolutionary theory there can be no revolutionary movement."

In Latin America, the printing facilities for revolutionary literature are constantly destroyed. A concrete contribution to hemispheric unity and support for the struggle for socialism in Latin America is the publication and distribution of literature such as the *Outline* in Spanish.

The Communist Labor Party is asking for your contributions to the socialist revolution in the Americas by donating money so that Workers Press can translate and print the *Outline for the Study of Marxism-Leninism* in Spanish. We are calling on all our friends, supporters, and their friends and colleagues to raise this money to help spread the ideas of socialism to the large Spanish-speaking section of our own working class and to revolutionaries throughout Latin America. We urge you to donate whatever you can to this necessary project.
