

- send a message to Washington that Americans are fed up with Congress and want their terms limited.

We are right now planning a press conference to announce the results to the news media. And we will send the results to President Bush, his senior White House advisors, all 535 members of Congress and all state elected officials.

We will gladly send you the results as well.

Most polls are of very tiny samples of voters. They usually ask only a few hundred people about their views.

Our survey is different. We aim to poll over 1,000,000 voters (that's ONE MILLION). This almost certainly will make our survey this year's largest poll on congressional reform.

You can bet that this survey will be studied very carefully by every member of Congress, and every politician in America – especially when we show them how many voters in their area of the country agree with us that terms for Congress must be limited.

I believe our survey will show that public anger at Congress is at an all-time high, and that a huge groundswell of outrage is building against all the corruption in Washington.

I think the American people are as outraged as I am that Congress voted to raise their salaries by 39% to \$125,000 a year in the midst of a devastating economic recession.

But that's not all, Congressmen also give themselves all sorts of expensive special privileges, like their ...

- * \$2 million pensions;
- * Free medical and dental care;
- * Free vacations, free meals, free travel;
- * Free legal services;
- * Free health spa membership and massage parlor;
- * Free parking and immunity from parking tickets;
- * Free chauffeured limousines; and
- * Free unlimited mass-mailings to voters as a way to ensure their re-election.

Well, actually none of this is "free." We taxpayers, you and I, pay for it all with our hard-earned tax money.

One of the things that really angers me are all the tax-funded vacations to foreign countries they take with their wives, family members, girlfriends, staff, and special interest lobbyists.
