

LET US EVOLVE TO GODHOOD

Can we originate unidealistically with no soul, no
spiritual spark, but rather with sensible atoms
and tangible stardust?

Why must there be a God at the genesis?

I can live without knowing, I can accept an atheistic
creation, I can even be religious without knowing,

But why not speculate?

Who says I cannot theorize?

I can have my phantoms, I can visualize beginnings even
though I do not require this knowledge.

What if cyclical Big Bangs were initiated by Gods for
their own needs?

What if penultimate Gods required the explicit power of
exploding Big Bangs to propel themselves into ultimate
Godhood?

Transcendent Gods could manipulate colossal explosions to
help them escape the collapsing cosmos and achieve
that eternal Godhood which most religions speak of,

Those who would evolve the Godly power to control Big
Bangs could escape collapse and death,

Those who are supremely successful in cosmic evolution
could even exist eternally!

I do not need to know about the beginning,

I am interested in where we are going more than where we
came from,

I do not feel despair over a Godless descent,

I do not feel alienated if I must ponder within a godforsaken
void;

But the Faustian imperative compels us to penetrate the
power of the Gods;

Life could evolve to Godhood, we could even have a Godless
origin yet still evolve to Godhood,
