is about over. Dark days are ahead unless something is done immediately!

Under the auspices of Crusade for God and Freedom, Dr. Wyatt has launched the "Student Statesman" movement to carry a mighty international crusade to reach young people for Christ and inform them of the deadly perils of Communism! We are publishing a hard hitting newspaper, "Student Statesman," and "sowing down" the college and high school campuses. Chapters of the movement are being started on campuses all over America. Students are encouraged to dedicate themselves *for* Christ and Americanism, and *against* the anti-Christ forces of Communism.

To teach them, we have created a remarkable correspondence course, "Student Statesman Seminar," covering the entire subject of Communism vs. Christianity in ten informative lessons. This is the finest material in print on the subject anywhere, and covers almost every question that could be asked. After passing an examination, the student will receive a diploma.

But do not assume that this is for students only. It is for everyone who wants to learn how to preserve our American heritage of freedom. Why not order this Course for yourself and for all the young people you know?

A NEW CORRESPONDENCE COURSE:

COMMUNIST PERIL TO YOUTH!

America has come awake with a jolt to realize that high school and college youth are No. 1 Communist target!

On March 9th a California legislator described many California colleges as "hotbeds for Communism." The same is true of colleges in other states.

The Communists do not expend much effort trying to subvert American children, for they are too young to understand. They ignore the bulk of the adult population and work on racial minorities, labor unions and dissatisfied social groups. Their principal target, however, is our youth. They have aimed their "big guns" at our high school and college age young people who are rebellious against parental discipline and the Church—youth with a desire for idealism without religious restraint. The Communists know this is the most impressionable age level.

The shocking fact that 83% of our young people declare they do not go to church, or *would not* if their parents did not force them, is eloquent proof that the overwhelming majority of the coming generation is extremely vulnerable to Communism since it is avowedly godless! The Reds know this and are planning a massive campaign to reach our youth. They have started a youth newspaper called "New Horizons for Youth."

Wings of Healing is keenly conscious of this greatest of all mission fields—youth. If the next generation of Americans is godless, churches, missionaries and Gospel radio broadcasts will soon be only fond memories. Each year church attendance is declining. The "religious boom"
