CAPITALISM INTERVENTIONISM OR SOCIALISM?

CAPITALISM is a wonderfully intricate free-running economic system, delicately balanced, responsive to consumer needs, and fully consonant with reason and reality. It means liberty and justice for all. It elevates the individual to a position of dignity and importance, brings happiness to millions, and leads to peace and prosperity throughout the world.

SOCIALISM, on the other hand, is a body of ideological doctrines, a rejection of reason, a system of intolerance and oppression where Man, an individual, is sacrificed to the great god Society. No economic system this! Born of envy, wedded to force, fueled with hate, setting class against class, it destroys all that Western man holds dear.
