Great Ideas that Shaped Our World

The classic thinkers you always *intended* to read (but never had time for) are now available on *audio cassettes*

A breakthrough approach to knowledge: Timeless works brought to life in sound!

Here is an entirely new concept in acquiring knowledge — easily, rapidly, enjoyably. There is *nothing else like it.*

We've taken many of the greatest thinkers of all time, and put their most important works on audio cassettes.

Thomas Jefferson, Adam Smith, John Stuart Mill, Henry David Thoreau, John Locke, Edmund Burke . . . and 13 others. Authors whose ideas and insights are as relevant to the events of today as they were to the events of their own time.

Audio Classics are dramatized condensations of the original books — brought vividly to life through an exclusive set of techniques we developed.

The greatest ideas of all time: clear, understandable and relevant

Snap an *Audio Classics* tape into your player and sit back. As one fascinating, intellectually challenging idea after another unfolds, you'll almost feel as though *the author is there in the room with you!*

Here is a tool to expand your horizons and broaden your perspectives. To benefit you both *personally and professionally.*

Today, the pressures of time don't always permit us the opportunity to enlarge our scope of knowledge.

That's why we decided to put these great works on tape. It's an *easy, convenient, time-efficient* way to learn . . . even while you're engaged in other activities. Spare minutes can be turned to productive use.

The wisdom of the past helps you better understand the present — and anticipate the future

If you spend 30 minutes a day in your car, you can acquire an education in the classics. Or you can audit the tapes while exercising, walking, on a plane, while doing household chores.

To read all 17 of these titles (and the supporting material required to fully understand them) would consume hundreds of hours of your time. With *Audio Classics*, you get the essentials of each work — during time that might otherwise be wasted!

The result? You'll be more knowledgeable. More confident. More articulate. More interesting. You'll be able to "hold your own" in any discussion. You'll better understand yourself, others, the world.

"In clear and understandable language, the *Audio Classics* series presents the great ideas that have shaped the political and economic institutions of the modern world. It is an idea whose time has come, and I recommend it highly."

William E. Simon

former U.S. Secretary of the Treasury and author of *A Time for Truth*
