

Can YOU Invest \$5 per Month to Help Alert and Save Your Country As Well As Have Survival Bases For Your Use In Times of Need And/or Emergency ? ? ?

As the dues-free Christian-Patriots Defense League (C-PDL), founded in 1977, and the Citizens Emergency Defense System (CEDS), founded in 1979, (both originally and presently sponsored by the Christian Conservative Churches of America (CCC), with their thousands of members have spread from coast to coast and border to border awakening, alerting, and organizing Christians and/or Patriots for our mutual protection, with numbers of them making their own homes, ranches, farms, and business places available for use as regular Defense League Post meeting places as well as places of gathering for our members in times of crises or need, many have asked how they could be of further assistance. This is a very real problem to those deeply concerned about the present condition and future of our Country, especially when so many of them cannot leave their homes, families, and jobs to travel by plane and automobile to sound the warnings and organize defense against the impending dangers of the enemy within our walls and at our gates of Freedom.

In other words, "How can we do more to help preserve and protect ourselves and Country and yet make a living and fulfill our obligation to our families, friends, and society?" has been the basic question.

The answer is very simple. If, for any reason, you are not able to travel, speak, or organize others to alert our Nation as to our common dangers, then you can help send those who can, will, and have the experience and ability to do so. In this way you become a very real and vital part of this whole historical event, sharing in one of the most moving moments of our national existence--that of preserving and defending our homeland.

For this purpose the PAUL REVERE CLUB was organized. It was named after that great Patriot of old who rode into our hearts and history when he alerted the Colonists that the Red Coats (British) were coming--Today it is the same color--red, (but not British) that is slowly surrounding our Nation and has infiltrated our society to the extent we are now in great peril.

In the light of these dangers, it was appropriate that another warning and alert system be implemented in our Nation, but greatly expanded from that of the 1700's. Those who now spread the alarm drive on four-lane highways in their automobiles, ride jet planes from city to city instead of horses as did Paul Revere, advertise from coast to coast, and appear on countless radio and television programs. but the message is still the same--"The Reds are coming--Be Prepared!"

As a result of the above question and in order that our warning, alerting, and preparation system could be expanded, improved, and increased, the Paul Revere Club was founded upon the basis that anyone who is willing to invest \$5 or more per month in their Country's survival and future will become a cooperating partner in this effort. Each member will be issued a Paul Revere Club membership card and an appropriate frameable 5 x 7 engraved Certificate of Recognition from the club, with the first 1000 members receiving a larger 8 x 10 certificate.

In this way, for a contribution of a little more than the price of a meal at a good restaurant or the price of two tickets to a theatre once a month, you become a part of a great team dedicated to the preservation of our Christian Heritage and Constitutional Freedoms, which in turn means your own safety and survival--in other words, the life you save may be your own.
