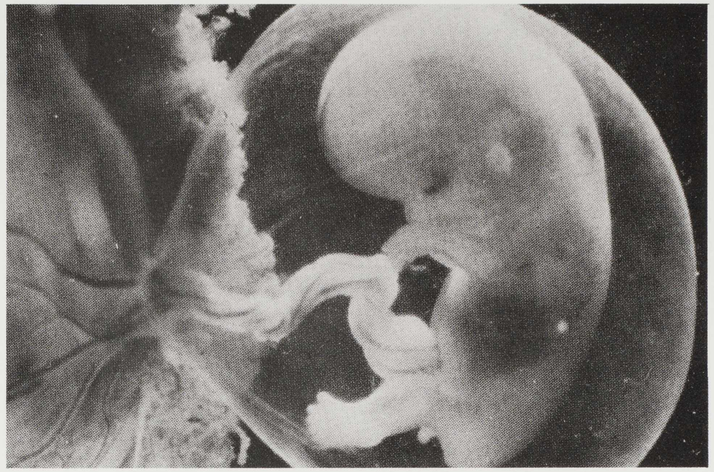
…Children Are Killed Here.

There's a child killing center in this building. It may have some euphemistic name like "Health Center," "Surgicenter," or "Women's Center," but the fact of the matter is that it exists principally to take the lives of unborn children through abortion. In the last few years, hundreds, even thousands of children have been killed here.

❖ ❖ ❖ ❖ ❖

Children Are Killed In America Through All Nine Months Of Pregnancy

In 1973 the U.S. Supreme Court ruled that unborn children had no rights and therefore could be aborted at any time before birth. Since then, nearly one third of all children conceived in our country have been killed by abortion. A casual glance through the Yellow Pages will show that abortion centers in this city kill babies at 8, 12, 16, and 20 weeks—and often beyond that point of pregnancy.



8-week unborn baby in the womb.

The Victims…

Children like these…

Eight-week babies, whose hearts are beating until they are stilled by the abortionist's knife. Twelve-week babies, whose bones have hardened, so that an instrument is used to snap the spine and crush the skull. Sixteen-week babies whose vocal chords are formed—but, without air, they are unable to scream. And twenty-week babies, whose mothers can feel their last desperate, kicks.

16-week unborn baby in the womb.

They Need Your Help.

Let's make our city safe for all babies.

HERE'S WHAT YOU CAN DO:

1. Educate yourself and others about the facts of abortion. Become an advocate for the unborn.
2. Speak out for life—do something to stop abortion and help women in a crisis pregnancy or support an abortion alternative center.
3. If the fact that innocent babies are dying in this building concerns you, we suggest that you contact the businesses in this building and tell them that you can no longer do business at a place where children are killed.
4. Get involved! Call the organization listed on the back of this brochure and ask them what you can do to help stop abortion in your community.

UNDECIDED?

Form a fact-based opinion—see an actual abortion on video.
