

creative living—not mere existence.

With this in mind, to help you prepare for civilized survival—the editors of International Forecaster have prepared a 15,000 word report called SURVIVAL SANCTUARIES. It deals with every geographical aspect of survival. The 'where'—rather than the 'how-to.' Included in this comprehensive survey is such information as...

- **Havens of Better Living:** Where to find the communities with the lowest crime rates (and actual places are listed)...the towns and small cities that charge less than 50¢ per hundred dollars of assessed value in taxes...the cheapest electrical power...the places with the highest 'quality of life'—according to nine different tabulations.

- **Havens of Health:** The towns and cities with the nation's lowest death rate for heart diseases...the healthiest towns in America...etc.

- **Wilderness Havens:** The 14 regions of America where you can still find good survival land for under \$200 an acre—with all the necessary essentials! Water... public road frontage...decent climate...etc.

- **Havens of Prosperity:** Where to find the pockets of prosperity, all across the country. Sometimes it's because of oil...a healthy local industry...a tourist 'magnet'...or any one of a hundred reasons. This report provides you with dozens of case histories.

- **Investment Havens:** "The future of America is in its small towns," says Howard Ruff. "That's where the money should be invested." SURVIVAL SANCTUARIES pinpoints dozens of unusually attractive communities—ideal for living and investment.

- **Foreign Survival Havens:** There are about a dozen foreign countries that could be suitable for Americans seeking a survival haven. Low prices—many other advantages.

This carefully researched information is all contained in SURVIVAL SANCTUARIES. It regularly sells for \$10—but it's free with a subscription to International Forecaster.
