

**The think-tanks of big business have come up with a "solution" to the decline of U.S. industry. But Sam Marcy shows that for working and oppressed people, the cure of "reindustrialization" is worse than the disease! This pamphlet covers:**

- **why the "Sun Belt" is attracting union-busting companies**
- **the enthusiasm of the military-industrial complex for "reindustrialization"**
- **why it will result in less jobs, not more**
- **the three different crises facing the U.S. ruling class**
- **a strategy of fight back for the working class movement**
