

\$10 Billion More for Israel?!

Israel is preparing to ask the U.S. government to guarantee \$10 billion in loan guarantees over the next five years to absorb Soviet Jewish immigrants. The loans would be used for housing, infrastructure development, job training and cash grants to immigrants.

So, we ask:

- What about the budget crisis in the U.S.—our cities are going bankrupt, our schools and roads are in decay, it's difficult to find adequate and affordable healthcare, and what about the homeless?
- The U.S. government doesn't guarantee loans for its own cities and states, so why Israel?
- What about other countries who need our help? We give more to Israel than to all of Africa! In fact, we give more than \$1,000 per Israeli every year, and less than \$1 per African!
- And, by the way, didn't we already give Israel \$5 billion in aid this year?

If you think this \$10 billion could be put to
better use...

"Just Say NO!"

to Israeli loan guarantees!
