"Our Tenth Year"

Dear Friends and Partners:

We who make up The Legal Defense Fund cannot do everything -- but we can do **some things!** We cannot defend **every** teacher or student or parent who is ridiculed, harassed or persecuted over Creation/evolution -- but we can defend **some** of these people.

Actually we are not alone in this great work. There are other fine groups such as **The Institute for Creation Research; Students for Origins Research; Bible Science Newsletter;** and many others. When we add up all the work which each group does we will find that we are having a terrific impact on our land -- and even our world.

Recently Film for Christ reported the exciting results after showing one of their films on Origins. Of those who saw the films, 91.5 percent became sure of Creation, whereas only 59.2 percent were confident of Creation before seeing the film.

But there's more -- 100 percent "became convinced that Evolution is not a proven fact..." Before seeing the film, some 34 percent thought evolution was fact.

Finally, before seeing the film some 61 percent believed it was alright for Christians to believe in evolution. After seeing the film, only 26 percent felt that way.

So, we have a tremendous tool available to us here. We can rent the video series on origins for home or church or for group meetings. The series is very effective and we should all make the very best of these important tools which have been provided for us.

It has also been announced that the Chinese Mandarin language translation of the Origins film series is completed.

"Now, millions in mainland China and Taiwan will be able to see strong evidence for God and his wonderful Creation
