

1980

NEW! FROM WORLD VIEW PUBLISHERS!

- Can the U.S. President really be considered the Commander-in-Chief over the military?
- What was General Alexander Haig's *real* role in the White House?
- How were 170 retired admirals and generals able to dictate a significant change of course in U.S. foreign policy?

This pamphlet analyzes the role of the military in the U.S. as seen in recent critical political developments. It also takes up the question of the long-term economic impact of the giant military-industrial complex, and how what was once a major stimulant to the economy is now a chronic depressant.
