

THE FAMILY RESEARCH COUNCIL

Spotted owls, global warming, overpopulation ... what are your children being taught, anyway? How much of your child's environmental education is factual and how much is simply hyped-up political activism in disguise? Most of all, how can you, as parents, set the record straight?

The answers to these questions and more can be found in a great new resource for parents, *Facts, Not Fear: A Parent's Guide to Teaching Children About the Environment*. This helpful, 300-page paperback book will give you insight into the unscientific and fear-provoking teaching that has been bombarding your children. The problem? Too much fear and too few facts. As Earth Day approaches, be ready to teach your children what they

are not going to hear elsewhere: the truth about our natural resources.

Want to know how you can help in the war against drug abuse? FRC is offering a new monthly fax entitled, "Family Research Council's Drug Facts." This two-page report will highlight important information about national drug policy. A one-year subscription is available for a suggested donation of \$12. To become a subscriber, call FRC at 1-800-225-4008, or write and provide your fax number. (This must be a 24-hour dedicated line.)

To order any or all of the above items, please complete the reverse side of this card and return to FRC.

FACTS NOT FEAR
