

Racial Comrades of the Left!

World war and revolution: We live in times when these two specters stalk the globe and fill the minds of true revolutionaries everywhere. And yet there is a third specter of even greater magnitude and significance which is looming ever-larger on the horizon: race war!

Certainly no honest and perceptive person can deny the reality of class distinctions and the struggle for economic and social justice. But just as certainly no honest and perceptive person can deny that the primary and most important distinctions and contradictions in the world at this time revolve around *race*. Yes, a new dialectic is being forged — *the racial dialectic!*

Too long now the intellectually fossilized "leaders" of the Marxist left have sought to deny even the existence of this earth-shaking new dialectic.

- ▶ For too long they have suppressed, ignored and distorted the truth about the significant material differences between the races. All their talk of "racial equality" is simply the most pathetic bourgeois idealism dressed up in Marxist garb — although even Marx himself realized the reality of racial differences!
- ▶ For too long now the bourgeois Jews who play such a prominent role in the Marxist left have sought to stifle the struggle against Zionist imperialism and to soft-peddle criticism of Israel. To be sure, they allow the Left some restrained outrage over the brutal suppression of the Palestinian people in the Middle East, but on the equally important issue of Zionist imperialism in the United States they remain perfectly silent! When — if ever — has the Marxist left raised its voice (for example) over the total Zionist domination of the American news media?

White comrades of the Left! We call on you to join us in forging this new racial dialectic! The capitalist System, the Old Order, is dying. Join us in the struggle for a new world order, based on the principles of:

1. Self-determination for all peoples of good will;
2. Maintenance of the biological integrity of the White race through complete geographical and political separation of the races;
3. International White unity;
4. Struggle against Zionist, Capitalist and Soviet imperialism;
