

HUD HAS MILLIONS OF DOLLARS TO REPAIR OUR BUILDINGS. WHERE IS THE MONEY GOING?

Last fall ACORN members fought to get rehab money from HUD so that our buildings would be safe and livable. We met with Ray Demmon, an official from HUD in Washington, D.C. He promised we would see "miraculous changes" by February.

We know now HUD has given the money to the management companies to fix up the buildings. But unless we organize to make sure the money is being used right, the money could get "wasted," just like it's been before; and we won't get our repairs.

Ray Demmon is back to check on how the repairs are going. If you haven't seen "miraculous changes" and don't want to see this money wasted, come meet with him!
