

"Child Discipline" is a book that tells people how to derive pleasure from beating children.

"School Girl International" is a magazine that offers "the true story of a 12 year-old girl and her Dad" -- and talks of the glory of incest.

The model in this awful book is no older than nine years old. The man, "her Daddy", is unshaven and wears a wedding ring.

The poses in the picture include suggestions of oral and anal sex.

Can you imagine the horror of young children being forced to pose for these pictures?

Can you imagine the emotional scars of young children being forced into committing such acts?

Right now there is a massive nationwide underground of king pin child pornographers who literally buy and sell children.

These pornographers stalk big city bus stations and buy children for \$5 or \$10.

Lloyd Martin, head of the Los Angeles Police Department unit of sexually abused children has said: "Sometimes for the price of an ice cream cone, a kid of eight will pose for a producer."

These king pin pornographers grow rich on the broken bodies and broken spirits of tens of thousands of children.

Young children are bought and sold right here in America.

Young children are sexually abused and scarred for life right here in America.

All because the liberals in Congress and leftwing pressure groups like the American Civil Liberties Union think that the pornographers right to "free speech" is more important than a child's right to live a normal life.

When our God-fearing Founding Fathers wrote the Constitution and declared that "Congress shall make no law restricting the free exercise of speech", I doubt that they intended to give a free hand to child pornographers.

And I know they would be horrified by the filth put out by the child pornographers.

Do you think it is right and proper that an eight year old boy and nine year old girl have sexual intercourse in a film?

And do you think it is right and proper to force children to have sex with a dog?

I am outraged by this blatant sexual abuse of children.

Congressman Pashayan and President Reagan are outraged as well.

That's why I have vowed to give Congressman Pashayan and President Reagan the support they need to end child pornography in America forever.
