

one militant homosexual was quoted as saying in the NEW YORK TIMES:

"We aren't oriented toward acceptance, but toward changing every institution in this country."

And to date, the homosexual/lesbian movement has pretty much succeeded, even to the point that nationally known David Throstad, a Marxist-Leninist advocate of sexual relations between adults and children, thinks "boy lovers" make better parents and regards the family as an "abomination."

This next article came to us from the Committee to Protect the Family:

"Homosexuality is not a victimless crime. In fact, you could become the next victim even though you've never even met a homosexual!" Dr. Paul Cameron

Friends, the statement above is absolutely true.

It concerns the rapid spread of a deadly disease being spread throughout our nation by homosexuals known as AIDS (Acquired Immune Deficiency Syndrome).

Already thousands have died from the disease and thousands more will die in the coming months.

And, unless you and I start doing something right now, America could be facing a plague as devastating and deadly as Europe's Black Plague of the Middle Ages.

Why haven't public health officials and the media begun a campaign to alert the public to the dangers of this killer disease and how to avoid it?

Because powerful militant homosexual organizations like the Gay Media Task Force are pressing them to remain silent.

Here are the facts that the news media and the public health departments are covering up:

1. A.I.D.S. is a killer disease that has already claimed more than 3000 lives. (Not all the dead were homosexuals)
2. The nation's blood supply (hospitals, Red Cross, etc.) has been contaminated by the disease. Already innocent patients in hospitals have died from A.I.D.S. contracted through blood transfusions.
3. There is no cure for A.I.D.S. To date, all those who have contracted the disease have died.
4. The incubation period for the disease is estimated at 2 to 3 years. (This means the disease is being carried and spread right now by people who don't even know they have it.)
5. The rapid rise of the disease parallels almost exactly the rise of the "Gay Rights" movement; homosexuals "coming out of the closet; and the establishment of "gay" bars and bath houses where homosexuals congregate.

Most, if not all medical scientists today recognize that homosexual behavior, that is, their "love-making" techniques and promiscuity have spawned this frightening disease.

The spawning grounds are actually the "gay bath houses" in cities across the country where homosexuals, through multiple sexual encounters are re-infecting each other with new pathogens that destroy the body's immune system.
