

Problems are solved by looking at them in new ways, not by patching up old "tried and true" solutions (which have been tried and found truly wanting). Don't dismiss an idea because it is new, offbeat, or "absurd". Remember that the grossest absurdity of all is using the same losing strategy over and over again.

Other people are involved, so develop the ability to think as they think. Don't automatically assume that others will view the problem as you see it. Cultivate the ability to put yourself in another person's shoes-- a person whose background, beliefs, and life-style are different than your own.

New ideas are desperately needed, new methods of fighting must be devised. This means that we all have to do our part, each must make his contribution and begin looking for new solutions now! We need your ideas on this question. We want you to share your thoughts with us. If we all work together, we can come up with a bold new strategy together. Give it serious thought, and then let us know what you come up with.

I want to thank each of you for the kind letters and cards that were sent to me after the shooting last January. At the time it was not possible for me to answer the many kind letters sent--thus I wish to do so at this time. I am happy to announce that I am fully recovered and have again resumed all activities. To show the enemy how much I fear them - I am operating out of my own home and book-store at 17-19 Harbor Avenue, Nashua, N.H. Some years ago a man said to me, "Major Gaedtke, it will have to get worse before it gets better. Our people will never be alerted by academic information or the perusal of printed warnings. They will only awaken when the torture and pain of the situation moves in upon them, until they realize that the destiny of every self-respecting soul is at stake."

That time has come. The cloud hangs over us. The lightning is flashing. The storm is upon us. There is not one item in this letter that does not represent a pain or a threat to every reader of this letter. At present Jimmy Carter and his stooge Andrew Young are in the midst of turning our nation over to the Communists - Rhodesia and South Africa have already been betrayed by Carter and Young et al. Soon Communist China will be allowed to take over the rest of China and the Republic of Korea.

Anyone who can read this letter and absorb the facts contained herein and be calm and indifferent can have little value to this Cause, but those who are constructively excited by this truth should resolve that they will do everything within their power to help us get the truth to the people.

I know this letter will reach some people who have great means. True enough, the rich young ruler went away sorrowing when the Lord asked him to make a sacrificial gift. So do not weep when I ask you to help me with the printing and postage expenses of mailing this letter across the nation. Pray to God for guidance and then give as the Spirit guides you. Help us stay in the front line resisting the treason and the debauchery effected by those who would destroy America.

For Christ and Nation!

E. William Gaedtke,
Advisor
