

Our Hopes, Our Dreams

≡ A VISION FOR AMERICA ≡

Just in time for a pivotal year in America's history, Family Research Council President Gary L. Bauer has written a compelling new book. In *Our Hopes, Our Dreams*, Gary spells out what America would be like with traditional values restored. It's a far cry from the fun-house mirror portrait too often painted by the liberal media. Here is a book for you, for your family, and for members of your church or civic group. Not only does Gary speak to the critical issues, but he provides useful questions for you to ask those who ask for your support.

As important, this is a book for you to share with your fair-minded but skeptical friends, neighbors and co-workers. If they *really* want to know what pro-family people believe, what the leaders of this remarkable grassroots movement hope to achieve, then they must read this book.

Gary has arranged with Focus on the Family to publish his latest book at the extraordinary low sale price of \$3.99. That is a testament to his faith in our grassroots movement. Member of the media establishment have long said: "We can't tell you what to think, but we can tell you what to think *about*." That will continue to be true until we have more grassroots American leaders willing to stand up for family, faith and freedom. To do that, you need the tools.
