by *Gail Kelly*, University College
of Ghana, Africa

VIII—PSYCHOLOGY

by *Walter R. Reitman*, Carnegie
Institute of Technology

Index of Authors Cited

The vastness of social science literature is demonstrated by the fact that more than 1000 authors and many more titles of books are cited in this *Guide*.

This book has been written by specialists in their subject matter in order to guide the non-specialist through this vast proliferation of literature in such a way that the reader will be able to select for his own reading that which is truly germane to his interests and needs.

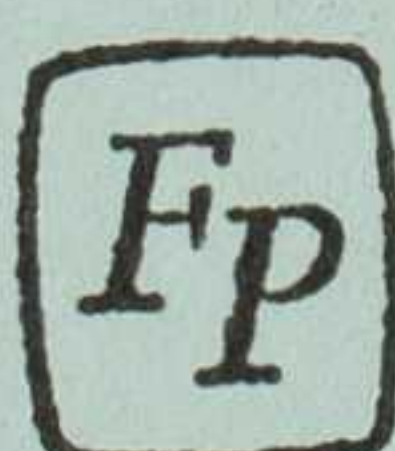

Each expert author (for example, the author of the chapter on political science is the managing editor of *The International Yearbook of Political Behavior Research*) describes the manner in which a special field of study has emerged and developed. Each discusses the important personalities and historically important writings, as well as the present state of each field and its most significant contemporary workers.

The book is attractive and inexpensive enough for use as a second text in general social science courses, and will of course make happy a generation of graduate students.

MOST IMPORTANT, THIS GUIDE TELLS WHAT TO READ — AND WHY TO READ IT.

PRICED AT \$2.95 PAPER BOUND

LIBRARY EDITION, \$6.00
