Clean Water Series,

An Eco-compendium of Water concerns: "Water Conservation," "Adopt-A-Stream," and "Water Sampling Analysis" all on one tape!

60 minutes **\$30.00**

a) Water conservation:

Compost Toilets and Cisterns, Are Compost toilets and cisterns the wave of the future? Find Out! This tape explores living examples and technical details. ASPI, 20 minutes, 1989. **\$25.00**

b) Adopt-A-Stream, This successful hands-on program developed by Delta Laboratories (in Rochester, New York), intimately involves high school students in water testing and monitoring. Narrated by Dr. Betsey Brauer, 1989, 20 minutes. **\$25.00**

c) Water Sampling and Analysis, A close up look at methods to train local citizens to conduct their own water analysis, with the West Virginia Mountain Stream Monitors, 1989, 20 minutes. **\$25.00.**

ASPI is a non-profit tax-exempt environmental organization seeking to make science and technology responsive to the needs of low-income people in Central Appalachia. Our appropriate technology and alternative energy literature and materials are applicable across the U.S. and in distant lands. Our environmental Resource Audits have been performed from coast to coast.

Through sharing the results of our research, minimizing waste, and utilizing low-cost environmentally sound technology, we hope to reduce the growing dependence on fossil fuels and outside foods. We believe in importing ideas, not products. For example, our Scandinavian-design cordwood house and the yurt, a traditional Mongolian structure, are constructed from local wood.

ASPI's philosophy involves living simply in ways that are healthy for the earth and for ourselves. The future of humanity lies in seeing all life as sacred and in restoring and renewing the planet. There is economic and political power in self-sufficient simple living and an absolute joy in walking close to the earth.

We Thank you for your support !
