THE FOUNDATION FOR ECONOMIC EDUCATION is an educational champion of private property, the free market, the profit and loss system, and limited government. It is non-political and nonprofit. It is responsible to no outside person or group—either in government, business, labor, or agriculture.

THE PLIGHT of American freedom is simply explained: Socialism (no private property, no free market, no profit and loss system, government without limit) gains because there is so little opposition to it. Bluntly, many persons don't like socialism but they are not skilled at setting forth freedom's position. Thus, socialism grows in America by default.
