Re: TFL&A Project #196-TE-05-001P  
Preliminary Environmental Site Screening (PESS)

For: 390-392 Pine Street  
Pawtucket, Rhode Island 02862

Dear Mr. Wershing:

Please be advised that in response to your request, Theodore F. Low & Associates, inc. (TFL&A) has completed a Preliminary Environmental Site Screening (PESS) for the property known as: Lot #496 on Plat Map 44 (390-392 Pine Street) in the City of Pawtucket, Rhode Island.

Based upon the environmental inspection by TFL&A personnel, the Federal and State environmental data records research as well as the City of Pawtucket records review, and the review of the previous environmental report, the consultant concludes that there are no visible and/or known environmental problems or concerns regarding any properties within a one mile radius of the subject site that would appear to have any environmental effects upon the subject property at the present time with the possible exception of the Standard Uniform property located at 354 Pine Street in Pawtucket. Please note that a remedial action program to treat and remove any contamination from releases of chlorinated solvents into the subsurface soils and groundwater at that site is currently underway. It is possible that this release might have affected the subsurface media at the subject site. Please be advised that you have the "right-to-know" the results of this remedial activity.

There are no known or recorded environmental problems and/or concerns listed at the subject site or abutting and nearby properties that would seem to indicate any significant environmental contamination that could be considered to be harmful to the public or to the environment itself. Based upon the available information concerning the subject properties, the consultant recommends that the following issues should be addressed:

1. The removal of the transformers that are located on the outside of the old office building. These transformers are not in use and appear to be of the older style that could contain PCBs.
2. The removal of all drums of known or unknown materials that are located in various parts of the main building that are not used for the current manufacturing process. The contents of these drums should be determined and properly manifested and removed by a licensed contractor.
3. Please note the explanation of the contaminated soils surrounding the fill and vent pipes as mentioned in Section 5.7 Underground Storage Tanks; these contaminated soils that are located above the concrete apron should be removed from the site.

4. There are excessive amounts of solid waste in different areas of the site that should be removed. Note the photograph of the solid waste on the old shipping platforms on the north side of the building.

5. The small areas of loose and friable asbestos viewed on the breeching and on some areas of pipe covering should be contained. Insofar as these areas are minimal, it is possible to contain the small areas of friable asbestos with "wet-pack" covering and could be accomplished by internal maintenance personnel.

NO FURTHER ENVIRONMENTAL INVESTIGATION AND INSPECTIONS ARE DEEMED NECESSARY OR REQUIRED AND/OR ARE WARRANTED AT THIS TIME. HOWEVER, TFL&A DOES RESERVE THE RIGHT TO MODIFY THE CONCLUSIONS AND RECOMMENDATIONS OF THIS REPORT IF ANY NEW INFORMATION REFERENCING THE SITE OR ITS SURROUNDING ENVIRONS BECOMES AVAILABLE.

Respectfully submitted,

Emily L. Boenning, CEI  
President

Theodore F. Low, CES  
Senior Consultant

Preliminary Environmental Site Screening (PESS)

Site: 390-392 Pine Street  
Pawtucket, Rhode Island 02862

1.0 INTRODUCTION

Theodore F. Low & Associates, inc. (TFL&A) of Providence, Rhode Island was retained by Mr. Frank Wershing of Tallman Enterprises, Inc. to evaluate environmental issues within the scope of a Preliminary Environmental Site Screening for the property identified by the City of Pawtucket Assessor's Office as Plat Map 44, Lot 496; the site is located at 390-392 Pine Street. TFL&A encountered or experienced no limitations in the form of physical boundaries, weather conditions or locked entrances during the site visit.

The purposes of TFL&A's Preliminary Environmental Site Screening (PESS) were to identify and define any visible and/or known environmental conditions, concerns and problems arising from the use, disposal or release of oil and/or hazardous materials on the subject site. Emphasis was also placed on determining the general presence of equipment likely to contain total petroleum hydrocarbons (TPH), polychlorinated biphenyls (PCBs), friable asbestos and any visible environmental concerns as well as good housekeeping practices in general and with respect to the handling of oil and hazardous materials.

This report does not include *de minimus* conditions that generally do not present a material risk of harm to the public health or to the environment and that generally would not be the subject of a notification and/or enforcement action if brought to the attention of the appropriate government agencies.

The enclosed Preliminary Environmental Site Assessment was performed by Theodore F. Low & Associates, inc. in accordance with the protocols and standard practices as prescribed by the American Society for Testing and Materials (ASTM) for Environmental Site Assessments Transaction Screens.

The following is a Preliminary Environmental Site Screening (PESS) ordered by Mr. Frank Wershing for:

390-392 Pine Street  
Pawtucket, Rhode Island 02862

Site Visit: 2 June 2005

### 3.0 SITE SUMMARY

The subject property consists of an irregular-shaped parcel of land with approximately 4.159 acres on the northwest corner of Conant and Pine Streets in the City of Pawtucket, Rhode Island. The site is improved with two brick buildings that were originally a part of the J. & P. Coates Textile Mills. The buildings with approximately 150,000 square feet of usable space were originally constructed in 1882.

A site inspection was made on Thursday, 2 June 2005. Mr. Abel Pereira, Vice President of Stretch Products, Corp., escorted the TFL&A inspector throughout the interiors and exteriors of the subject property. The weather was clear and sunny with an average temperature of 69 degrees Fahrenheit.

Potable water is supplied to the property by the City of Pawtucket; the Narragansett Bay Commission services the site with a public wastewater discharge sewer system. Electricity, Natural gas and communication services are supplied to the buildings by the local utilities.

The smaller of the two buildings that faces Pine Street was the original office building for the mill complex. This two-story building is currently leased to two small manufacturers. One of these companies makes safety clothing; the other sews costumes for theater productions. This building is heated by natural gas-fired heating equipment.

The larger of the two buildings is currently occupied by Stretch Products, Corp., a manufacturer of textile stretch fabrics and products. This four-story mill building, with a partial basement, is heated by an oil-fired packaged boiler that is also used for processing. No. 2 fuel oil is stored in a 10,000 gallon underground storage tank that is located outside of the boiler room on the southwest side of the main building. See Section 5.7 Underground Storage Tanks for more on this UST.

Asbestos containing materials in the form of pipe covering and breach covering were noted in the larger building in the boiler room; although most of this asbestos appeared to be in good condition, small amounts appeared to be in poor condition and could be friable. Further testing is required to determine the presence of "number two" or non-friable asbestos i.e. ceiling or floor tiles. No floor drains were noted in the buildings. The inspector was advised that the fluorescent lighting fixtures in the buildings had been updated and appear to be of the newer style; fluorescent lighting fixtures with old-style ballasts can contain often PCBs (polychlorinated biphenyls).

Several transformers were noted on the outside of the smaller building; these transformers appeared to be of the older style and could contain PCBs. The transformers currently in use inside the main building do not appear to be of the older style containing PCBs. Several drums containing unknown substances were found during the inspection. The inspector was advised that the contents of these drums were not used in the current manufacturing process. Some excessive amounts of solid waste were discovered during the site inspection.

There is a large grassed area and a gravel and asphalt/concrete covered parking area in between the buildings. The parking area is in fair condition.

The TFL&A inspector was able to view the MSDS (Material Safety Data Sheets) that were made easily available to all employees. Copies of the MSDS sheets kept on file for the hazardous materials used on site are in this report

According to the USGS topographical map, the inferred groundwater flow typically appears to conform to the topographical gradient and would be expected to flow in an easterly direction towards the Blackstone River that is located approximately 3/4 of a mile to the east of the subject site. Please be advised that true groundwater flow can only be determined and verified by the installation of groundwater test wells into the subsurface and the comparing of the measurement of the groundwater elevations in each well; however, due to subsurface man-made structures and other unknown hydrological influences, groundwater flow direction may vary locally and temporarily. The quality of the groundwater in this general area is classified by RIGIS and RIDEM as GB. GB is a classification of groundwater that is not normally suitable for public drinking without treatment. The subject property is approximately 86 feet above mean sea level.

#### 4.0 AREA PROPERTIES

The subject property is located on the northwest corner of Conant and Pine Streets in the City of Pawtucket and approximately 3/4 of a mile to the west of Pawtucket City Hall. The subject property is a part of the original J & P Coates mill complex. Most of the surrounding properties are companies that have occupied other buildings in the complex. The Paramount Cards, Inc. abuts the subject property to the north; Conrad Textile Jobbers and New England Knitting Company are located to the south of the subject site. Alckar-Chartle, a lighting bulb manufacturer, abuts the subject property to the west; Martone's Fabricators is located directly across Pine Street to the east.

All of the aforementioned properties in the environs of the subject site appear to be maintained and in good condition; there is no reason to believe that any of these abutting or nearby properties would have any environmental effect upon the subject property with the possible exception of the Standard Uniform Company that is located 0.07 miles to the southeast of the subject site. Please note the explanation of the existing Site Investigation Report and the ongoing Remedial Action Work that is explained in SECTION 10.0 CONCLUSIONS AND RECOMMENDATIONS; a copy of the 12 January 2005 from North County Environmental Services, Inc. is in the appendix of this report.

#### 5.0 GOVERNMENT RECORDS REVIEW AND INQUIRY

TFL&A personnel conducted a file search of the Federal (USEPA) and the State (RIDEM) environmental database records. State, Federal and local databases were accessed in an Environmental FirstSearch Report through FirstSearch Technology Corporation's database program on 4 May 2005. TFL&A makes no representation on the accuracy of the information provided by third parties nor did TFL&A make any further independent investigations beyond the scope of this environmental assignment and those noted in this report. Please be advised of the following database information regarding the subject property and all properties located within a one mile radius of the subject property. There are no listed or known environmental problems and/or concerns with the subject site itself or any properties within a one mile radius of the subject property that should be of environmental concern.

### Section 5.1 NPL Sites

The NPL is the EPA's list of confirmed or proposed Superfund sites. There are no NPL (National Priority List) sites listed within a 0.50 mile radius of the subject site.

### Section 5.2 CERCLIS Sites

The Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) is the EPA's database of current and potential Superfund sites currently or previously under investigation. There are no CERCLIS site listed within a 0.50 mile radius of the subject site.

### Section 5.3 RCRA Hazardous Waste Handlers

The RCRA database is EPA's database of registered hazardous waste generators and treatment, storage and disposal facilities. There are no RCRA generators listed as a TSD facility (Treatment, Storage and Disposal Facility) that are located within a 1/2 mile radius of the subject site, nor are there any RCRA COR (Corrective Action Sites) located within that same radius.

However, there are five active RCRA generators that are located within a 1/8th mile radius of the subject site and seven additional RCRA generators that are located within a 1/4 mile radius. There are eleven RCRA "no longer regulated" generators that are located within that same radius.

The principal manufacturer at the subject site, Stretch Products Corp., is listed as a small quantity generator that generates 100-1000 KG/Month of Hazardous Waste. There were no listed or known violations found concerning this generator.

Please note that eleven of the twelve RCRA generators have a status of SGN. SGN is recognized as a Small Quantity Generator generating 100-1000 KG of hazardous waste per month.

Optical Polymer Lab that is located at 214 Weeden Street is listed as a VGN RCRA generator. VGN is a very small generator generating less than 100 KG per month of hazardous waste and is given the status of being conditionally exempt by the regulators.

The following is a list of the RCRA generators located within a 0.25 mile radius from the subject site:

RCRA Generator	Distance from Subject Site	Status	Violations
Stretch Products	Site	SGN	None
Standard Uniform	0.07 miles to SE	SGN	None
Congress Auto	0.10 miles to NE	SGN	None
Nynex	0.12 miles to NE	SGN	None
M&F Case	0.12 miles to SE	SGN	None
Paramount Cards	0.13 miles to NW	SGN	*Six (see below)
Conrad Jarvis	0.15 miles to SW	SGN	None
Mandeville Signs	0.16 miles to NE	SGN	None
Graham-Field	0.17 miles to NE	SGN	None
Globe Narrow Fabrics	0.22 miles to SW	SGN	None
Optical Polymer	0.24 miles to SW	VGN	None
Quality Auto	0.25 miles to NW	SGN	None

\* Paramount Cards had a series of violations that occurred in 2001 following an inspection. It appears that all of these violations were resolved in August of 2001 without remediation activities; these violations often involve record keeping, storage and handling procedures.

A review of these active and no longer regulated RCRA generators indicated that there has been no environmental effect upon the subject site from these generators. No environmental violations were cited against any of the above sites.

#### Section 5.4 ERNS

ERNS (Emergency Response Notification System) is the USEPA's database of the EPA's emergency response actions. There are two ERNS sites listed as having occurred within a 1/4 mile radius of the subject property. Both of these ERNS sites were Laidlaw that is located 0.13 miles to the northwest. In both instances, leaking drums of methyl ethyl ketone were released. Drums were off-loaded and the releases were remediated with no environmental effect upon the subject site.

#### Section 5.5 SHWS

SHWS (State Hazardous Waste Sites) is the RIDEM's list of confirmed disposal sites and locations to be investigated as well as a database of confirmed sites as maintained by the agency. There are ten listed SHWS located within a 1/2 mile radius from the subject site. An additional twenty-three SHWS sites occurred over a 1/2 mile radius from the subject site.

A review of these sites indicated that there is no reason to believe that either of these SHWS sites have had or currently have any adverse environmental effects upon the subject property based upon location, distance and remediation activities.

The following SHWS sites are listed as being within a 0.50 mile radius from the subject site:

SHWS Site	Distance from Subject Site	Status
Globe Narrow Fabrics	0.22 miles to SW	Inactive
Globe Narrow Fabrics	0.22 miles to SW	Inactive
Rand Street Complex	0.30 miles to NW	Inactive
Centennial Towers	0.35 miles to SE	Active
Parkin Yarn	0.36 miles to SE	Inactive
MAACO	0.37 miles to SE	Active
Petula Associates	0.38 miles to SE	Active
Dennis Printing	0.49 miles to NE	Inactive

#### Section 5.6 Spills

Spills are the RIDEM's database of emergency response actions and spill releases. Please note that there were Six spill incidents listed as having occurred within a 1/4 mile radius of the subject site.

These spill incidents included the following:

- A release of a drum of Toluene and oil at 400 Pine Street (0.13 miles to the NW)
- A release of 100 gallons of heating oil at 345 Barton St (0.13 miles to the SE) and an additional release of 25 gallons of fuel oil at that same location.
- An unknown amount of waste oil was abandoned at 420 Pine Street (0.17 miles to the northwest).
- A small release of hydraulic oil occurred at Dexter & Barton Streets (0.19 miles to the NE).
- An explosion resulting in the release of 55 gallons of Methyl Methacrylate occurred at 214 Weeden Street (0.24 miles to the SW).

The spills appeared to be contained and remediated with no further environmental effects.

#### Section 5.7 Underground Storage Tanks (USTs)

USTs (Underground Storage Tanks) are listed in the database of the Rhode Island Department of Environmental Management by the Underground Storage Tank Section of the Division of Waste Management. It is the record of all of the registered USTs in the State of Rhode Island and includes a listing of LUSTs (Leaking Underground Storage Tanks).

There are twenty-one UST sites located within a 1/4 mile radius; the subject site is one of these UST sites.

The subject site has a registered UST with a capacity of 10,000 gallons that is used for the storage of No. 2 heating oil. This vessel is properly registered with the RIDEM; accumulated contaminated soils that are located in the "fill box" were observed by the

inspector. The "fill box" is a small wooden structure that is located over the fill and vent pipes leading to the UST. Over a period of time, the oil delivery companies have been careless during delivery and have released fuel at this "fill box"; as a result, the soils on top of a concrete apron have become contaminated. Although the amounts of contaminated soil are small and contained within the wooden structure and appear to be prevented from continuing to contaminate the soils beneath the concrete apron, the existing contaminated soils should be removed and care should be exercised during all future deliveries.

There are five listed LUSTs (leaking underground storage tanks) sites located within a 1/4 mile radius from the subject site. The listed LUSTs located within a 1/4 mile are:

Lust Site	Distance from Subject Site	Status
Standard Uniform	0.07 miles to SE	Soil Removal Only
Pawtucket Fasteners	0.11 miles to SE	Inactive
NE Telephone	0.12 miles to NE	Soil Removal Only
Paramount Cards	0.13 miles to NW	Soil Removal Only
Paramount Cards	0.13 miles to NW	Soil Removal Only
Emergency Shelter	0.26 miles to NE	Soil Removal Only

A review of the information concerning the LUST sites that are located within a 1/4 mile radius from the subject site indicated that there appeared to be no environmental effects upon the subject site from these leaking vessels.

Please be advised that TFL&A personnel reviewed the underground tank files at the Office of the Fire Marshall at the City of Pawtucket Fire Department. There are no records regarding the UST on the subject property with the Pawtucket Fire Department.

#### Section 5.8 Public Water Supplies and Aquifers

There are no known public water supply sources located within 0.50 miles of the subject property. The subject site is located over an aquifer that is classified as a non-potentially productive aquifer.

There is no reason to believe that the subject site would have any environmental effect upon this aquifer. The City of Pawtucket Water Supply Board services the general populace in Pawtucket with potable water.

#### Section 5.9 Wetlands, Floodplains and ACECs

The site appears to be located in the general area of a 500 year floodplain. This floodplain is located 0.44 miles to the southwest. There are seven ACECs (Areas of Critical Environmental Concern) that are located within a 1/2 mile of the subject property. These ACECs include Parks, Recreation, Schools and Playground areas. There are no wetland area listed on the National Wetlands Inventory as being within a 0.50 mile radius of the subject site. The nearest surface water is the Blackstone River that is approximately 0.70 miles to the east of the subject site. There is no reason to believe that the subject site would have an

environmental effect upon any of the ACECs, floodplain or any wetlands, if in fact they do exist.

#### Section 6.0 Solid Waste Landfills

There are no listed or known solid waste landfills located within a 1/2 mile radius of the subject property.

#### **7.0 FIRE DEPARTMENT/LOCAL INFORMATION**

Discussions with the Public Works, Engineering Department, Building Department of the City of Pawtucket and other Town Offices indicated that there are no known or recorded environmental violations, hazards or concerns regarding the subject property. Please be advised that no record of the existing 10,000 gallon No. 2 fuel oil storage tank was found in the records of the Office of the City of Pawtucket Fire Marshall.

#### **8.0 SANBORN FIRE INSURANCE MAPS/RECORDS**

Sanborn Fire Insurance Maps are historical maps that were used for fire insurance purposes; these maps often depict prior usages of properties. Sanborn Maps were found for the subject property for the years 1923 and 1949. In both maps, the property was depicted as a large textile mill complex. It appears that a textile mill was in operation when these maps were made. The inspector was advised by local people with knowledgeable information of the general area that the subject site had been a large textile mill for more than 100 years.

#### **9.0 PREVIOUS ENVIRONMENTAL REPORTS**

No previous environmental reports on the subject property are known or were made available to the consultant.

#### **10.0 CONCLUSIONS & RECOMMENDATIONS**

Based upon a site visit and the environmental inspection of the property by TFL&A and the TFL&A research of public documents as well as the environmental data record research, TFL&A concludes that there are no listed or known environmental problems or concerns with the properties within the general environs of the subject property with the possible exception of the Standard Uniform Company that is located at 354 Pine Street and approximately 0.07 miles to the southeast of the subject property. Standard Uniform is listed on the LUST, the UST and RCRA generator lists.

Included in the appendix is a letter dated 12 January 2005 from North County Environmental services referencing a Site Investigation Report and a Remedial Action Work Plan for the release of chlorinated solvents at the nearby property at 354 Pine Street in Pawtucket. It is possible that this release may have migrated to nearby or abutting properties including the subject site. At the completion of the remedial activities, groundwater sampling will be conducted to confirm or deny the fact that any contamination that could effect the environment of human life still remains. The owners of this contaminated site are responsible to notify the abutting and nearby properties about the results of this remedial activity.

There is no reason to believe that the subject site has any environmental problems

concerns or liabilities and does not appear to pose a threat to the public health or to the environment itself with regard to any previously known or current on-site activities; however, there are several issues that should be addressed. The consultant recommends the following:

1. The removal of the transformers that are located on the outside of the old office building. These transformers are not in use and appear to be of the older style that could contain PCBs
2. The removal of all drums of known or unknown materials that are located in various parts of the main building that are not used for the current manufacturing process. The contents of these drums should be determined and properly manifested and removed by a licensed contractor.
3. Please note the explanation of the contaminated soils surrounding the fill and vent pipes as mentioned in Section 5.7 Underground Storage Tanks; these contaminated soils that are located above the concrete apron should be removed from the site.
4. There are excessive amounts of solid waste in different areas of the site that should be removed. Note the photograph of the solid waste on the old shipping platforms on the north side of the building.
5. The small areas of loose and friable asbestos viewed on the breeching and on some areas of pipe covering should be contained. Insofar as these areas are minimal, it is possible to contain the small amounts of friable asbestos with "wet-pack" covering and could be accomplished by internal maintenance personnel.

**NO FURTHER ENVIRONMENTAL INVESTIGATION AND INSPECTIONS ARE DEEMED NECESSARY OR REQUIRED AND/OR ARE WARRANTED AT THIS TIME; HOWEVER, TFL&A DOES RESERVE THE RIGHT TO MODIFY THE CONCLUSIONS AND RECOMMENDATIONS OF THIS REPORT IF ANY NEW INFORMATION REFERENCING THE SITE OR ITS SURROUNDING ENVIRONS BECOMES AVAILABLE.**

#### **11.0 WARRANTY**

The conclusions contained in this report are based upon the information available to TFL&A as of 4 May 2005. The scope of services for this investigation included those issues within the scope of a Preliminary Environmental Site Screening Report. No representations regarding the conditions of subsurface soils and/or groundwater quality at the site can be made based upon TFL&A's scope of service. TFL&A provides no warranties on information provided by a third party and contained herein. Data compiled was in accordance with TFL&A's approved scope of services and should not be construed beyond its limitations. Any interpretation or use of this report other than those expressed herein is not warranted. The use, partial use, or duplication of this report, except for the exclusive use of Mr. Frank Wershing of Tallman Enterprises, Inc. without the express written consent of Theodore F. Low & Associates, inc. is strictly prohibited.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

Environmental Questionnaire

To be filled out by the Applicant/Seller/Occupant; please check your response to the best of your knowledge, and comment or explain any specific problems or concerns at the end of this form.

Subject Property: 392 Pine St. Pant. R.T. 02862 -  
390 -

Name of Person completing Questionnaire: ABEL - PEREIRA - V.P

1. What is the current use of the property?

- ☐ Commercial  
☒ Industrial/Manufacturing  
☐ Residential  
☐ Agriculture  
☐ Other

2. What is the age of the structure?

- ☒ Built in or before 1980  
☐ Built after 1980

2a. Is there any presence of asbestos?

- ☒ Yes  
☐ No

2b. Does the building have fluorescent lighting?

- ☒ Yes  
☐ No

2c. Is it possible these fixtures have ballast's containing PCBs?

- ☐ Yes  
☒ No New -

2d. Is there a transformer, capacitor or any hydraulic equipment on the property?

- ☒ Yes  
☐ No old style w/PCBs

2e. If residential, is there any presence of lead paint?

- ☐ Yes  
☐ No

3. Is the property currently used, or has been previously used, as any of the following: an industrial or manufacturing facility, a gasoline station, a motor repair facility, a dry cleaners, a commercial printing facility, a photo-developing laboratory, a junkyard or landfill, or a waste treatment, storage, disposal, processing or recycling facility?

- ☒ Yes  
☐ No

4. Are any adjoining or abutting properties currently used or have been used as described in the preceding question?  
☒ Yes  
☐ No
5. Are there currently, or have there been previously, any damaged or discarded automotive or industrial batteries, pesticides, paints or other chemicals in individual containers greater than 5 gallon containers in volume or 50 gallons in aggregate, stored or used on the property?  
☒ Yes  
☐ No
6. Are there currently, or have been previously, any industrial drums or sack of chemicals located on the property?  
☒ Yes  
☐ No
7. Has Fill Material been brought to the site?  
☐ Yes  
☒ No
- 7a. If Yes, what type of Fill?  
☐ Construction Debris  
☐ Trash  
☐ Clean Soil  
☐ Potentially Contaminated Soils  
☐ Other
8. Are there currently, or have there been previously, any pits, ponds or lagoons on the property connected with waste treatment or waste disposal?  
☐ Yes  
☒ No
10. Are there any septic systems, dry wells or leach fields on the property?  
☐ Yes  
☒ No
11. Other than stormwater or water discharged into a sanitary sewer system, does the property discharge wastewater onto the subject property or onto any adjacent property?  
☐ Yes  
☒ No
12. Are there currently, or have there been previously, any USTs (underground storage tank) located on the property?  
☒ Yes  
☐ No 10000-gallon #2 oil
- 12a. If Yes, were any tanks installed after 1988?  
☐ Yes  
☒ No

- 12b. If Yes, has leak detection equipment been installed with the tank?  
☐ Yes  
☒ No
- 12c. If tank exists, has it been tested for leaks?  
☐ Yes  
☒ No
- 12d. Did any tank(s) replace an old tank?  
☐ Yes  
☐ No
- 12e. If Yes, was any contamination found?  
☐ Yes  
☐ No
- 12f. If Yes, was contamination cleaned up?  
☐ Yes  
☐ No
13. Are there currently, or have there previously been, any aboveground storage tanks on the property?  
☐ Yes  
☒ No
- 13a. If Yes, has the tank leaked or has there ever been a spill?  
☐ Yes  
☐ No
14. Are there currently any floor drains?  
☐ Yes  
☒ No
- 14a. If Yes, are these drains connected to the public sewer system?  
☐ Yes  
☐ No
15. Is the property served by a private well?  
☐ Yes  
☒ No
16. Has the groundwater under the property been tested?  
☐ Yes  
☒ No  
☐ Unknown
17. Are there any groundwater monitoring wells on the property?  
☐ Yes  
☒ No
18. Has an environmental site assessment ever been performed on the property?  
☐ Yes  
☒ No

- 18a. What type and what year? \_\_\_\_\_
- 18b. If Yes, did the report indicate the presence of any potential contamination?  
☐ Yes  
☐ No
- 18c. If Yes, was any remedial activity done?  
☐ Yes  
☐ No
19. Are you aware of any environmental litigation or administrative action related to an environmental problem or concern involving the subject property?  
☐ Yes  
☒ No
- 19a. involving any abutting properties?  
☒ Yes — standard Uniform  
☐ No
20. Have any demolition debris, hazardous substances, petroleum products, unidentified waste materials, automotive or industrial batteries, tires, trash been dumped, burned or buried on the property?  
☐ Yes  
☒ No
21. Are there any wetlands on the property?  
☐ Yes  
☒ No

Site Inspection Checklist for TFL&A Inspector: T.F. Low

Subject Property Address: 392 Pine St. Pawt. R.I.

1. Is there any evidence of USTs on the subject property?  
☒ Yes  
☐ No
2. Is there any evidence of stained soil, concrete or asphalt on the property covering an area greater than one square yard?  
☒ Yes  
☐ No around. Fill & vent Box
3. Is there any evidence of stressed or dead vegetation (not explained by natural causes)?  
☐ Yes  
☒ No
4. Are any foul odors emanating from the property?  
☐ Yes  
☒ No
5. Is there an oily sheen or any discoloration of surface water on the property?  
☐ Yes  
☒ No
6. Are there any groundwater monitoring wells?  
☐ Yes  
☒ No NONE VIEWED
7. Are there any discarded drums, barrels, containers, construction debris, damaged or discarded automobile or industrial batteries, or paints, pesticides or other chemicals in individual containers or drums of greater than 5 gallons or 50 gallons in aggregate?  
☒ Yes  
☐ No
8. Is there any evidence that the property was used as a gas station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, landfill or waste treatment storage disposal, processing or recycling facility?  
☐ Yes  
☒ No Textile mill
9. Are there ASTs on the property?  
☐ Yes What do they contain? \_\_\_\_\_  
☒ No NONE VIEWED
10. Is there evidence of stained walls or flooring other than from water?  
☐ Yes  
☒ No

11. Does the property have floor drains not discharging into a sewer?  
☐ Yes  
☐ No *None seen.*
12. Is there evidence of dumping on the property?  
☐ Yes  
☒ No
13. Is there evidence of unusual heaps, mounds, depressions, or sinkholes on the property indicating excavation and/or filling?  
☐ Yes  
☒ No
14. Does any insulation or fireproofing appear damaged, flaking or friable?  
☒ Yes *Buzzing*  
☐ No
15. Does any paint appear to be flaking, peeling or chipped?  
☐ Yes  
☒ No
16. Are there any wetlands on the subject property?  
☒ Yes  
☐ No

**STATE OF RHODE ISLAND**Department of Environmental Management  
Office of Waste Management**UNDERGROUND STORAGE TANK FACILITY  
CERTIFICATE OF REGISTRATION**This certifies that **STRETCH PRODUCTS, INC.**

has been duly registered pursuant to Rule 6.00 of the regulations for Underground Storage Facilities Used for Petroleum Products and Hazardous Materials based upon factual representations contained in the Applications for Registration. Any substantial modifications to the systems at this facility or changes in information contained in the Applications must be reported to the Department.

## Facility Address:

392 PINE ST  
PAWTUCKET, RI 02860

Chief, Office of Waste Management

This certificate effective 01 Jul 2004 and expires 30 Jun 2005 or until 45 days following issuance of a fee invoice.

This certificate cannot be transferred to any other person, facility or location without the express written approval of the Director. This Certificate acknowledges only that the above-referenced facility has complied with the registration requirements of Rule 6.00 and DOES NOT indicate this facility's compliance with any other section of the regulations. This Certificate may be suspended, modified or revoked in accordance with the Regulations.

The following tank(s) have been duly registered at this facility:

TANK NO.	STATUS	SUBSTANCE	CAPACITY

Pawtucket, Rhode Island 02860

RE: Site Investigation Completion Remedial Action Work Plan  
354 Pine Street, Pawtucket, RI  
NCES Job Number: C3047

To Whom It May Concern:

On behalf of Standard Management Corp, the current owner of the property located at 354 Pine Street in Pawtucket, Rhode Island, North Country Environmental Services, Inc. (NCES) is providing this letter as public notification, pursuant to the State of Rhode Island Department of Environmental Management (RI DEM) Office of Waste Management, Remediation Regulations, Section 7.07. The notification is required for the owner of each property directly abutting 354 Pine Street.

On or about January 12, 2005, NCES provided a Site Investigation Report and Remedial Action Work Plan to the RI DEM of the historic release of oil and/or hazardous materials at 354 Pine Street. The release of chlorinated compounds has been attributed to the historic use of the property as a industrial laundry facility from the 1960's. As part Standard Management Corp.'s assessment and remediation of the site, NCES is proposing treatment of the source area by chemical oxidation to eliminate contaminated soil from the property. Upon the completion of the proposed remedial activities, confirmatory soil samples shall be collected and submitted for laboratory analysis. The laboratory analysis results shall be used to conduct a Method One Risk Characterization to determine if any significant environmental and/or human health risk remains at the property. A summary of the remedial response actions and the Risk Characterization shall be submitted the RI DEM.

A copy of then Site Investigation Report and Remedial Action Work Plan may be reviewed at the RI DEM's office in Providence, RI. If you wish to review the Site Investigation Report and Remedial Action Work Plan, contact the RI DEM at (401) 222-6800 and refer to the above noted address and RI DEM Case Number. Additionally, questions regarding the ongoing investigation may be directed to our Milford Office or email Robert Berger at NCES1@aol.com.

Sincerely,  
North Country Environmental Services, Inc.

  
Craig Jasse  
Environmental Engineer
