

PHYSICIANS FOR SOCIAL RESPONSIBILITY

BOX 104 - BROOKLINE 46, MASSACHUSETTS

As part of PSR's continuing program of providing its members with basic information on the issues of war and peace we are enclosing a most penetrating analysis of the arms race, which appeared in the April, 1962 issue of Scientific American.

Members may wish to use the enclosed advertisement from the New York Times in their waiting rooms to share with their patients their concern over the resumption of atmospheric nuclear testing.
