

ear, and reproductive systems. The Anamod comparative anatomy package demonstrates comparative differences between the hearts and brains of a human, bird, amphibian, reptile and fish. Each Anamod comes with illustrations and a descriptive text about functions and locations.

\$8.95 for each model. \$69.95 for each set. (REDCO)

The Anatomy Coloring Book. High School through College

This book teaches concepts, structures and systems of human anatomy and physiology. It provides experience in preparing color plates of anatomical and physiological systems and contains 142 plates of line illustrations with cutouts of human anatomy and physiology organized according to body systems.

\$13.95 (HARPER AND COLLINS)

The Bio-Monitor. High School through College

The Bio-Monitor is a simplified ECG that amplifies cardiac bioelectrical signals by providing students with an audible and visual response. Students can compare their heart rates while sitting, standing, or lying down. The monitor comes with a lab manual that allows students to compare the variability of data between sexes, athletes, smokers, etc., and explains bioelectrical theory.

\$115.00 (PHIPPS AND BIRD)

Human Anatomy Charts. High School through College

A series of charts of human anatomy, organs and systems with a three-dimensional perspective and magnified detailed views of anatomical complexities. Charts include: lymphatic system, circulatory system, internal organs of the chest and abdomen, the heart, nervous system, digestive system, male and female pelvis, urogenital system, skeletal and muscular systems, anterior and posterior views, head, neck, throat and skin, brain, eye and ear, and heart.

\$66.00 for each chart. (DENOYER-GEPPERT)

(The above is only a *partial* list of the many alternatives available. Please contact The AAVS for information on other suppliers. Prices listed are subject to change, call the following suppliers for the most current information.)
