

I communicate, almost clairvoyantly, the great cause of nature.

The immature material evolves to the bio-spiritual, the time-honored activating "soul" is Nietzsche's will-to-power extended to an empyreal goal.

The cosmos contains the selective progression of the bio-spiritual soul to Godhood, or supreme power, by means of eugenic racialism, which is the holy grail of cosmic evolution.

The victorious in evolution do not collapse with the universe, the unvanquished evolve to become Gods!
