

Dear Jane Wallace:

You had an opportunity to inform the public about important information concerning Jennifer Casolo that others in the media suppressed. You had the videotape that exposed the absurdity of her claim that the arms had been buried in her yard without her knowledge. You had documents that had been found buried with the arms that revealed that she was a political radical. You suppressed this information. I wonder why.

Will you accept Accuracy in Media's request that you air a program that will permit the other side to be heard and the suppressed information to be shown? Your response will show whether or not you are an honest journalist who believes in telling both sides.
