

— MULTIPLE CHOICE —

Choose which society you would like to live in:

A society where some people are very rich, most are wage slaves, many are homeless or hungry, and the rich buy politicians and own a multi-billion dollar "free press" industry to tell people what to do and how to think.

A society where some people are very powerful bureaucrats, most are wage slaves, and the bureaucrats tell everyone what to do and how to think.

A society after nuclear war has killed most life on earth.

None of the above.

If you answered "None of the above" you are not alone. It's the choice of most of the people in most of the countries around the world.

If you want a society where people cooperate but don't tell each other what to do or think, where there are no bureaucrats or bosses, and where people get fair compensation for the work they do... if you want to talk with people who are working for such a world, try talking with us.
