

N.R.A

The National Rifle Association has elected Charleston 'Moses' Heston as its new head. Old Moses first rattle out of the box was to hold a CNN interview in which he stated that private citizens have no reason to own an assault weapon like an AK-47 and that he is comfortable with the Brady law! This will be the new NRA. What else could anyone expect from Heston? He is not the heroic figure he plays in the movies, he is a team player, one of the elite. His idea of guns lies in the elites sport of trap shooting and up land bird hunting. You know the type. Instead of standing for the second amendment- for freedom & liberty. For the second amendment as it is intended, for an armed populace to be the final check and balance against tyranny in our justice system! They collaborate with the new world order politicians hoping to give up assault rifles and handguns to appease the one-worlder, do-goodies (who want to secure everyone in a straight jacket for security) hoping to save their browning over and under, weatherby deer rifle or cowboy action shooting game. Will this be the same NRA which supported for election or re-election of Cong. Jim Chapman (of this district) even when he voted for every gun control law? This is one reason why I personally do not support nor belong to the NRA. I'm tired of being sold out and dealing with the lesser of the two evils- be it a politician to vote for a organization

which says, but doesn't fight for my rights. The NRA will become a lion without teeth just as the republican majority has become. The true fighter for gun rights was defeated, Neal Knox was his name. He was defeated by Heston.

Star Chamber

The commissars of Bowie Co. Texas have come up with a "Orwellian" idea. Video court: Using the excuse of needing more security (seems we are hearing that word more and more when the system smothers more rights and established more police state programs) because of the growing number of violent offenders will be sitting in court or holding cells: these criminal defendants might stage an uprising, overtake court room security, and take hostages. An up-rising of handcuffed and shackled prisoners who are guarded by corn-fed armed guards in black jump suits and military boots!!!

The system works with only the judge, prosecuting attorney, and the defense can be seen by the inmate. The inmate is locked in a small room with a TV monitor & microphone. They do not get to face their accusers or see the jury. What's next? Secret trials and sentences to the Gulag? It's not just criminals- for the next target can be YOU.
