Judgment Day for those True to their Inner Light

This Awareness indicates that there is, for those who remain true to their own God-Seed, their own Inner Light, the protection of that Light and the future happiness that comes with being true to yourself as a spiritual being, even though there may be hardships. This Awareness indicates that each entity lives many lifetimes, and these lifetimes are but brief candles, and though each one seems so important during that time period, it is when you are out of time, out of space, and within your own soul energies that your real worth and totality is realized. That is, in fact, the Judgment Day or time.

This Awareness indicates that for those who have been true to their own spiritual essences, their greater energies and future will be that which brings the joy of being themselves, of having been true, and in looking back on physical struggles, these will be seen as mere dreams, or in some cases, nightmares of no significance; but to those who have yielded to the nightmares, who have in those physical lifetimes sold out to the Dark Forces, given up their spirituality,--when these entities pass on into other realms, they find themselves within the greater reality of goblins, ghosts, forces that haunt them from their own demented memories; those things which have suffered at their hands, those astral shells come at them, tormenting, reminding them, and they feel great guilt and sorrow, and call out to be punished, to be cleansed and purged of these memories of what they have done.

What the God-Seed in Humans Accomplishes

This Awareness indicates that the nature of the God-Seed implanted in humans which is lacking in many other forms of life, is that with each succeeding generation, the God-Seed becomes stronger. In this sense, everyone who is human is evolving toward God-Realization, and this evolution toward God-Realization follows stronger with each offspring, or at least the opportunity for this occurs, if it is not programmed out of the humans.

This energy of each succeeding generation to become just slightly more God-like, more aware, more evolved; this is the result of that God-Seed within each individual. There are, of course, influences that can be brought to bear on a human to attempt to destroy or retard that spiritual development, and there are forces that work to accomplish this. If these forces were not present on the earth plane and if humans were allowed to progress naturally and unaffected by these forces, each succeeding generation would become more highly spiritual than the one before.

WILL THE ELOHIM ABANDON THE HUMAN RACE ?

Why Humans are a Unique Species

This Awareness indicates that the human being is a unique creation as compared to many of the other aliens, because many of these aliens lack the Divine God-Seed. While they have a life force which comes from the Creator, it does not burn as brightly as with the human being. This Awareness is not indicating that humans are unique in this respect, for there are those higher beings that even have this God-Seed in a brighter and more glowing way.

This Awareness indicates that part of the human uniqueness is that they were an experiment to place humanity with a God Seed and allow it to grow in an environment that was not altogether perfect, but wherein there were pitfalls and giving humanity the freedom of choice, to choose between the more gross and the more Divine paths or directions is that which has made humanity on earth a unique species. It is for this reason that as long as there is the chance, the hope, the potential for human evolution toward greater spiritual expression, the human species will be protected. If it comes to a time wherein the evidence indicates the project was a failure, then the Elohim will turn their back, and allow the experiment to end.

WHAT ARE THE ODDS THE ELOHIM WILL DECIDE THE HUMAN EXPERIMENT IS A FAILURE?

(FOLLOW-UP QUESTION):

What are the odds, roughly, that the Elohim might determine that the experiment overall was a failure?

COSMIC AWARENESS:

This Awareness indicates that this will be largely decided after the events occur in which mankind in general chooses not from ignorance, but from clear realization, whether to follow the aliens for physical safety, or whether to follow their own Divine Destiny. This Awareness indicates that there will be many who tend to follow the alien with the misconception that they are divine teachers here to help, but there will come a time when everyone knows clearly that they are not for the highest good of humanity, and each individual will have a choice.

There are of course, children who will be forced by their parents to follow the choice of the parents. These entities will not be held accountable in that regard. That likewise, even if the human race is exterminated or allowed to simply be devoured by the alien presence, individuals as souls will still be able to

EVIL REPTILIANS/GOATS PREVENT GOD-REALIZATION

WHY IS THIS PERMITTED?
