

ORGANIZING AROUND REGISTRATION/RESISTANCE DAY

Two major national efforts to coordinate work to combat the March 31st national registration day are being organized, each with the cooperation of a number of groups. One, coordinated by the Fellowship of Reconciliation, will focus on the need for resistance to draft registration. The other, called "Taking a Stand Against War", is a more general drive to explain alternatives to young men. Literature is available from the addresses below to aid you in local work around the registration/resistance day.
