# Future Forecasts: 1981-1983

## America...Russia...the coming Economic Collapse:

17 important predictions—from the organization whose forecasts, over the past five years, have been 78% accurate.

Plus: An unusual strategy to profit from future events.

Dear Fellow American:

Don't be fooled by the 'Reagan Euphoria'. Don't be lulled into a false sense of security.

Your country is on the brink of a twin disaster -- that threatens our national security...the stability of our economic system...and, indirectly, many of our democratic institutions. Specifically:

- \* America and the Soviet Union are moving towards a major military confrontation within the next 18 months. Unfortunately, we will be ill-equipped to meet this Russian challenge -- and the outcome is far from certain.
- \* This country, and the rest of the industrial world, is facing an economic collapse that will rival the Great Depression. If this happens, it will provide the Soviet Union with its greatest opportunity since the end of the Second World War.

Yes, dangerous times are coming -- despite President Reagan's best efforts...despite short-term jumps in the stock market. That's inevitable. (We're going to pay for our fiscal sins, and military unpreparedness.) But if we know what to expect...if we prepare for what's coming...if we understand the significance of those future events -- then our chances for survival become much better. Indeed, we can actually profit from the upheaval that lies ahead.

Let me show you what I mean...
