

Alien Invasion of North America

In all the world's history never has a strong, productive, advanced Racial Nation of people, occupying a geographical territory, separated in the main by great oceans from the earth's diverse, primitive peoples, been invaded and occupied by these regressive alien hords with such impunity!

Aryan technology (Fulton's steamboat, Wright brother's airplane) plus Aryan treason made possible what was impossible for these mongrel peoples to accomplish. They, who have never dreamed of steam or jet power, land on our shores daily. Skilled Aryan captains, piloting Aryan-conceived craft, bring the alien hords to our shores in 747 luxury beyond the wildest imagination of ancient kings.
