

Theses on Socialist Education

Kim Il Sung

- What is the goal of education in the northern part of Korea?
- How can Korea's socialist and working class foundations be strengthened and hostile ruling class ideologies be fought?
- What kinds of educational opportunities can boys and girls growing up in People's Korea today look forward to?

In "Theses on Socialist Education" these questions and others are answered by President Kim Il Sung, the practical and theoretical leader who guided revolutionary Korea through victorious struggles against Japanese colonialism and U.S. imperialism to the building of a modern, socialist state in the northern part of Korea.
